Tang,2017-12-30 Future of work requires a new way of leadership with creativity a key differentiator between humans and robots in the workplace We are facing a big challenge with robots and automation happening in workplaces jobs will be lost and work activities automated The earlier you accept this transformation the earlier you adapt to this change and manage your career Whether you are an employee or business owner you have to move up the value chain quickly and focus on creative and innovative output which is more difficult for robots to replicate Regardless of industries future workplaces require leaders who are creative and innovative Future leaders need to focus on The 3i s individual mindset infrastructure ideas mastering 9 essential leadership and career skills to edge over robots This book is written for you if You are paranoid about the future You want to invest and prepare yourself so that you and your businesses will survive and thrive in the future You want to figure out how to lead in the future Disregard it at your peril If you plan to be relevant in a digitally connected world then you need to read this book Simon Cocking Senior Editor at Irish Tech News Leadership has been disrupted by the future of work Dickson s book brings this guiding principle to light R Ray Wang Principal Analyst Founder Constellation Research Inc **The Future of Strategy: A Transformative Approach to Strategy for a World That Won't Stand Still**

Johan Aurik,Martin Fabel,Gillis Jonk,2015-01-02 Own the Future of Your Industry with a Transformational Strategy Designed for Today s Business World Leaders today are inundated with strategic opportunities besieged by business disruptions and pressured to innovate to do things better faster or differently The CEO of a Fortune 500 firm explains it best I am looking at 23 different strategic initiatives Trying to develop and implement so many strategies is like trying to change the driver tires the oil and the bumpers paint the body and tune the engine And doing all of this on a car that s running at full speed The answer used to be found in strategy But in the past decade the commonly deployed large scale strategic exercises were largely discredited They were slow and elaborate and did not deliver the expected returns let alone help make sense of a glut of initiatives or cope with an increasingly unpredictable future The Future of Strategy brings strategy back from those big top down plans It answers the questions of executives facing tumultuous business conditions and rapidly shifting markets Is strategy still possible Yes Aren t strategies outdated before they can be implemented Not if they are done right Rather than developing strategy aren t we better off being agile and able to capitalize on emerging trends faster than our peers Agility complements strategy it cannot replace it This book is about reversing course and repositioning strategy in its rightful place as the overarching management system The authors introduce their core methodology designed to future proof companies against the friction and fog of war that inexorably accompany changing times They synthesize three fundamental principles that when combined provide the means to reclaim strategy Take direct cues from fundamental trends affecting the company

going forward Engage people across the company to translate these cues into strategy and effectively eliminate the handover hurdle between formulation and execution a major reason for strategy failure Capture the output as competitive opportunities and manage their life cycles when some have run their course others are ready to take over Strategy today requires stepping over the shadows of one's own ingrained beliefs to capture new opportunities This book reveals the inner workings of transformational strategies developed by leaders who gradually become more successful by advancing winning combinations of attitudes values habits and practices

Contemporary Work and the Future of Employment in Developed Countries Peter Holland, Chris Brewster, 2020
Whilst only in the second decade of the 21st century we have seen significant and fundamental change in the way we work where we work how we work and the conditions of work The continued advancements of smart technology and artificial intelligence globalisation and deregulation can provide a sleek view of the world of work This paradigm can deliver the opportunity to both control work and provide new challenges in this emerging virtual and global workplace with 24/7 connectivity as the boundaries of the traditional organisation melt away Throughout the developed world the notions of work

and employment are becoming increasingly separated and for some this will provide new opportunities in entrepreneurial and self managed work However the alternate or bleak perspectives is a world of work where globalisation and technology work together to eliminate or minimise employment underpinning standardised employment with less and less stable or secure work typified by the rise of the gig economy and creating more extreme work in terms of working hours conditions and rewards These aspects of work are likely to have a significant negative impact on the workforce in these environments These transformations are creating renewed interest in how work and the workforce is organised and managed and its relationship to employment in a period when all predictions are that the pace of change will only accelerate
