The Ross 248 Project Les Johnson, Ken Roy, 2023-05-02 HUMANITY'S HOPE FOR A BETTER FUTURE AT A NEW STAR

A bold journey into a future where humanity and its children travel to a new star where they must overcome the unexpected challenges on the exoplanets that await them or die trying. Traveling to the stars will be difficult but not perhaps the most difficult part. What about when we get to another star? What then? Will the planets be immediately habitable? Not likely. Will those who undertook the journey be able to easily turn around and come home if they don't find Earth 2.0? Almost certainly not. Therein lies the challenge: finding worlds that are potentially habitable and then taking the time, perhaps centuries, to make them compatible with Earth life. They will encounter mysteries and unexpected challenges, but the human spirit will endure. Join this diverse group of science fiction writers and scientists as they take up the challenge of The Ross 248 Project.

Contributors: USAF General Steven Kwast, Patrick Chiles, Stephanie Osborn, Brent Ziarnick, Laura Montgomery, Daniel M Hoyt. That's easy enough. But then he describes with wonderful detail the Starshot nanocrafts, chipsats, Starwisps, worldships, and metamaterial LightSails that we might use. It's a flight of imagination backed up with real-world science. Bill Nye, Les Johnson is that rare breed of writer who can make rocket science comprehensible even to the layperson. He has more than paid his dues in the field, and his enthusiasm for the cause of interstellar exploration shines through. But so does his sense of humor, his humanity, and his zest for life. This is highly recommended stuff.

David Weber: Is humanity ready to take on the immensities outside our solar system? This traveler's guide lays out methods and means that may enable our first steps into the great unknown beyond the sun's familiar campfire.

David Brin: About Mission to Methone. The spirit of Arthur C. Clarke and his contemporaries is alive and well in Johnson's old-fashioned first contact novel set in 2068. There's a great deal here for fans of early hard SF.

Publishers Weekly: About The Spacetime War. Johnson, a NASA physicist, brings verisimilitude and scientific accuracy to this adventure, and his passion for the details of space travel will undoubtedly please readers looking for old-school hard science fiction. His narrative enjoys a slow-building sense of development as he gradually unravels multiple mysteries. Johnson's fans will find plenty to enjoy.

Publishers Weekly: [Sodomy in Eighteenth-Century France](#)

Jeffrey Merrick, 2020-10-27: We know more about men who sought and had sex with men in eighteenth-century Paris than in any other city at the time. Police records provide information about thousands of sodomites who were arrested, and thousands more who were not. Michel Rey explored the sodomitical culture of the capital in five articles based on one set of sources published from 1982 to 1994. No one has completed his pioneering work in the archives and challenged his anachronistic conclusions about identity, community, and effeminacy. This book, the first on the subject based on extensive research in all of the relevant series of police records, explores patterns and changes in the lives of men who desired men and in the surveillance and punishment of same-sex relations across the century. Chapters 1 and 2 offer a more systematic, skeptical, and

subtle analysis of complex questions about mentalities than Rey did Chapters 3 and 4 discuss the ways in which sodomites made connections through solicitation in public spaces and networking in private places and the ways in which the police tracked them Chapters 5 and 6 analyze the operations of agents who entrapped sodomites and the procedures of magistrates who judged them The book examines what the extant sources do and do not tell us about the heads hearts and hands of men detained or mentioned by the police To that end it includes a generous selection of documents that allow us to hear voices from the archives including many that require us to rethink what we thought we knew about the subculture
