The long held belief that work and home are separate spheres of economic life was turned on its head overnight. Many employees were new to this way of working, and many employers had to manage a disparate workforce for the first time. This book reviews what impact this shift had on the lives of millions of employees, the organisations which employ them, and the societies in which they live. It also looks to a future in which more work is carried out remotely, at home, in the local cafe, restaurant, or bar, or while moving from place to place. The book synthesises the existing evidence in an accessible and easy-to-read way. It will appeal to all those who want a quick and concise introduction to the major themes associated with remote and hybrid working. This will include teachers, lecturers, students, academics, and policy makers, as well as those who have experienced the challenges and benefits of homeworking first hand. **Agile Processes in Software Engineering and Extreme Programming - Workshops** Philippe Kruchten, Peggy Gregory, 2023-12-27 This open access book constitutes papers from the research workshops presented at XP 2022 and XP 2023 respectively, the 23rd and 24th International Conferences on Agile Software Development, held on June 13-17, 2022, at the IT University of Copenhagen, Denmark, and June 13-16, 2023, in Amsterdam, Netherlands.
