THE COMPLETE GUIDE TO SUSTAINABLE TRAVEL

This is an exhaustive list and can seem overwhelming, but it gets easier if you take it a step at a time.

BEFORE THE TRIP

Consider your transport options

- Choose airlines that use renewable biofuels.
- Choose non-stop flights. Planes produce the most carbon emissions during take off and landing.
- Offset your carbon footprint by paying a small fee when making a booking. The fee is donated to programs that help reduce the amount of carbon dioxide in the atmosphere, such as planting trees.
- Choose road or rail transportation instead of flights (e.g. trains and buses). Planes burn a lot of fuel, thus producing greenhouse gases which contribute to global warming.
- **X Avoid cruise ships.** Cruises are "floating cities" that have a huge environmental impact (e.g. with waste disposal, fuel and energy expenditure, pollution by exhaust fumes).
- Carpool where possible.
