The Earth can absorb no more than 3 tonnes of carbon dioxide emissions each year for every person on the planet if we are to keep temperature and rainfall change within tolerable limits. Yet from cars and holiday flights to household appliances and the food on our plates, Western consumer lifestyles leave each of us responsible for over 12 tonnes of carbon dioxide a year, four times what the Earth can handle. Individual action is essential if we want to avoid climate chaos. *How to Live a Low Carbon Life* shows how easy it is to take responsibility providing the first comprehensive one-stop reference guide to calculating your CO₂ emissions and reducing them to a sustainable 3 tonnes a year.
