Typhoid or Typhoid fever, also called enteric fever, is a potentially fatal infection caused by the bacteria *Salmonella typhi* (Enterobacteriaceae family). The typhoid fever is very contagious and can spread through the infected person's faeces or, less frequently, through urine. Typhoid affects around 2.6 crore people each year, resulting in 2,15,000 deaths worldwide.

Children are especially vulnerable to typhoid in places with insufficient access to safe drinking water and sanitation.

Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals.

These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents.
