Alexander, Ask most adults who Typhoid Mary was and they'll tell you a lie They'll tell you she was someone who killed hundreds of people Maybe even thousands They'll tell you she was a woman who knew she had a deadly disease and didn't care that she spread it to others But is it true No Most of it is not true Here is Mary's story Read about her early beginnings as a 15 year old girl who traveled alone from Ireland to New York There she had to find a job so she began work as a servant After several years she worked her way up to being a cook and people said she was a great cook Mary had no trouble finding jobs until the families she worked for started catching typhoid Suddenly Mary was arrested and sent to an island There she was tied to a hospital bed and forced to give samples of her blood urine and feces for the doctors to test on She was being used to test all kinds of drugs Finally one of the newspapers took her side along with many people The Health Department decided that if Mary agreed not to cook for people they would set her free Mary agreed She got a job working in a laundry but it was hard work and didn't pay enough Mary was cold and starving She also believed she had never had typhoid and that she was simply chosen by the Health Department to run tests on because she was all alone in America No one would fight for her So Mary decided to fight for herself She changed her name and went back to work as a cook Find

Constructing the Outbreak Katherine A. Foss, 2020-09-25 When an epidemic strikes media outlets are central to how an outbreak is framed and understood While reporters construct stories intended to inform the public and convey essential information from doctors and politicians news narratives also serve as historical records capturing sentiments responses and fears throughout the course of the epidemic Constructing the Outbreak demonstrates how news reporting on epidemics communicates more than just information about pathogens rather prejudices political agendas religious beliefs and theories of disease also shape the message Analyzing seven epidemics spanning more than two hundred years from Boston's smallpox epidemic and Philadelphia's yellow fever epidemic in the eighteenth century to outbreaks of diphtheria influenza and typhoid in the early twentieth century Katherine A Foss discusses how shifts in journalism and medicine influenced the coverage preservation and fictionalization of different disease outbreaks Each case study highlights facets of this interplay delving into topics such as colonization tourism war and politics Through this investigation into what has been preserved and forgotten in the collective memory of disease Foss sheds light on current health care debates like vaccine hesitancy
