Digital World Economy. An economic perspective on industry 4.0 Anton Nikitin, 2018-10-04 Seminar paper from the year 2018 in the subject Economics Innovation economics grade 1 3 University of Wuppertal Jean Monnet Chair for European Economic Integration language English abstract The elementary technology the Internet enabled the fourth industrial revolution It changed the way people work The collaboration in server clouds and the so called Internet of Things allows even machines to interact Many questions are still unsolved e g the key technologies or their impact on the economic growth of economics Nowadays the transformation process is ongoing while the impact of this technological change is still unclear The McKinsey consulting group estimates that just the internet accounts for 21 percent of the GDP growth in major economies over the past five years Furthermore researcher mention that the share of ICT capital is often underestimated In real terms evaluated in prices in 1995 the share of ICT was roughly twice as high because of the continuously falling prices for ICT technologies and services Fifteen years prior the landscape internet driven companies seemed to stop the growth path after the Dotcom Crash Before the expectations of immense productivity gains were higher than the possibilities of the technology Also the average employee was not ready to handle the challenges of digitalization robotic and the pace of technological change In 2017 digitalization and automatization literature provides a wide range of IT specific but also managerial specific guidance Available economic papers referring to industry 4 0 are comparatively few And if available then are more focused on the impact of ICT on economic growth This paper tries to fill the gap to the point of a political economic perspective on industry 4 0 The object of interest is particularly productivity changes caused through digitalization and automatization which can be summed in the main driving forces of industry 4 0 The initial point of the investigation is the theoretical framework of the Cobb Douglas Production Function It will be converted in an applied model form which could be tested with the EU KLEMS database To justify a claim of this kind growth accounting estimates are used The traditional neoclassical methodology determines a contribution to growth from an exogenous technological change in the Solow residual estimate of total factor productivity TFP growth

Multi-Channel Distribution in the Age of the Digital Customer Sebastian Schulz, 2015-05-13 Bachelor Thesis from the year 2014 in the subject Business economics Miscellaneous grade 2 0 Baden Wuerttemberg Cooperative State University DHBW course BWL International Business language English abstract In this thesis the author approaches multi

channel distribution within the age of the digital customer centralizing a strategic adoption in the German automotive industry. By applying a qualitative empirical research design he determines key success factors and imperatives for building an effective digital business strategy in the German automotive industry and discloses general factors for success to thrive a multi channel business. The choice of journals was based on the journal ranking at <http://www.vhbonline.org> service journal status as of 21/01/2014 whereas the author's focus were highly ranked journals from diverse sources within the areas: 1 Business Strategy Strategy and Digital Business Strategy 2 Marketing Multi Channel Marketing 3 E Commerce E Commerce and E Commerce Strategy and 4 Innovation management Business Model Innovation. The Journal of Marketing Harvard Business Review International Journal of Electronic and Commerce European Management Journal and MIS Quarterly depict the preferential literature source. Furthermore guideline interviews with industry and solution experts from 4 of International Machines Corporation IBM have been executed. Having a clear vision across all functions and effective communication with all employees will be vital for the German car manufacturers to embark on the journey of becoming a multi channel business attracting the digital customer. Creation of awareness for the shift and adopting additional sales channels besides integrating the car dealership networks within the emerging multi channel environment offering unique product presentation in digital showrooms and building strategic partnerships with IT providers in order to thrive. Additionally car manufacturers that can offer a seamless customer experience across all physical and digital touch points through integrating and penetrating the additional sales channels within the existing ones besides managing emerging channel conflict and building a central data base for customer insight and relationship management will outreach their peers. Having a strong integration in between the customers suppliers and business processes in combination with personalized and targeted marketing all driven by a top down leadership approach with strong change management capabilities will enable a car manufacturer to transform operations on a digital basis towards a multichannel business.
