## **The Child In Time:**

*Ian McEwan* Irena Księżopolska, 2024-04-30 This book offers a discussion of seven canonical novels by Ian McEwan: *The Cement Garden*, *The Comfort of Strangers*, *The Child in Time*, *The Innocent*, *Black Dogs*, *Atonement*, and *On Chesil Beach*. It introduces radical new readings which are offered not as ultimate and conclusive solutions of the textual puzzles but as possibilities to engage with the text creatively to enrich the critical consensus and restore interpretative freedom to the readers. This project formulates a strategy of inclusive reading, an approach to the text that does not seek to reduce it to a single interpretation and yet is comprehensively informed through the analysis of the primary text, critical discussion, authorial comments, and the context of the composition. Each reading demonstrates the metafictional structure of the texts, indicating that McEwan's works may be treated as invitations to roam within their worlds, examining the multiple frames of their structure and the meanings generated thereby. All the chapters attend to submerged, repressed, or deliberately masked voices. *The Cement Garden* is seen as a multi-layered dream with a shifting hierarchy of dreamers. *The Comfort of Strangers* is viewed as an inverted metafiction with insubstantial characters corrupting more complex heroes. *The Child in Time* is read as Stephen's book written for his dead daughter. *The Innocent* as a memory narrative of Leonard who refuses to notice Maria's role as a spy. In *Black Dogs*, the over-exposure of unreliability is studied as a screen for personal trauma. In the analysis of *Atonement*, Briony's claim to authorship is questioned, and Cecilia is suggested as an alternative narrative agent. Finally, examining *On Chesil Beach*, both characters' voices are reconstructed in search of the superior narrative power which, in the end, is seen to be elusive as the text seeks to undermine the hierarchy of voices.

**Functional Behavioral Assessment, Diagnosis, and Treatment, Third Edition** Ennio Cipani, 2017-07-28 Featuring a highly interactive approach, this text is noted for its exceptionally clear and thorough coverage of how to conduct a functional behavioral assessment (FBA) through various assessment methods, how to diagnose the function of problem behaviors, and how to select a behavioral intervention that addresses the diagnosed function. The development of requisite behavior analytic skills is aided by utilizing many real-life and hypothetical cases that represent common scenarios in applied settings. Highlights include: Interactive approach icons in the text alert readers to review related narrated on-line lectures highlighting FBAs and treatments and complete assignments embedded in text. Numerous cases, many based on the author's clinical experiences in working with children and adults in educational and mental health settings, provide a realistic look at applied behavior analysis. Forms, interview protocols, and intervention plans illustrate the process of creating behavior plans from collected assessment data. A pioneering classification system for categorizing the function of problem behavior, Cipani's BCS Cases, that model the process of assessment, classification, and treatment used in an FBA, allow readers to role-play and develop presentation and classification skills. New to this edition: Chapter objectives and BACB Standards that match the content to be covered with objectives from the Behavior Analyst Certification Board (BACB) task list help readers master some of the skills required of behavior analysts.

Assignments and discussion items with associated narrated Power Point lectures to further engage readers Simulation Exercises to actively involve readers in collecting data conducting an assessment demonstrating the use of a function or observing how to shape an alternate behavior Self Assessment exercises to help readers test their understanding of the content The Cipani EO School Behavioral Interview Rating System to help in conducting interviews The Cipani Replacement Function Classification System for determining the strength of replacement behaviors Online instructor s resources including test items tied to the chapter objectives a conversion guide for adopters tips for creating a course syllabus and using the discussion questions and assignments and the chapter objectives the BACB standards and assignments Online student resources including narrated PowerPoints and video lectures An ideal text for courses in applied behavior analysis behavioral or emotional assessment or management child psychopathology or developmental disabilities taught in school psychology special education behavior analysis psychology or social work anyone who assesses and treats patients with challenging behaviors will also appreciate this book

Treating Child-Abusive Families Jeffrey A. Kelly,2013-11-21 During the past ten years the problem of child abuse has been the subject of increased attention both in the professional community and among the general public The reasons for this widespread recognition are clear First professionals of many disciplines deal with child abusive families and do so in a variety of ways Physicians hospital staff and teachers are often the first to assess a child as the victim of abuse social workers and child protective personnel investigate cases of suspected abuse court and legal authorities make determinations concerning the needs of an abused child and mental health professionals including psychologists social workers and family counselors often have responsibility for treating abusive families Few clinical problems have received this kind of widespread interdisciplinary recognition and given the nature and seriousness of child abusive behavior few problems receive such intensive attention within each profession s literature A second factor responsible for increased study of child abuse is the fact that violence directed toward children is probably the most extreme form of family dysfunction seen by counselors therapists and other practitioners While other types of child management and anger control problems occur far more frequently the consequences of child abusive behavior are much more serious than the consequences of other problems seen in child or family clinics It has been estimated that as many as 550 000 children are the targets of parental abuse in the country each year Helfer Kemper 1976
