Michael William Davidson

The Chimpanzees Of Gombe Patterns Of Behavior:

The Chimpanzees of Gombe Jane Goodall, 1986 Presents a scientific chronicle of Jane Goodall's career and documents the Gombe chimpanzees social behavior over the last 26 years

The Mind of the Chimpanzee Elizabeth V. Lonsdorf, Stephen R. Ross, Tetsuro Matsuzawa, 2010-08-15 Understanding the chimpanzee mind is akin to opening a window onto human consciousness Many of our complex cognitive processes have origins that can be seen in the way that chimpanzees think learn and behave The Mind of the Chimpanzee brings together scores of prominent scientists from around the world to share the most recent research into what goes on inside the mind of our closest living relative Intertwining a range of topics including imitation tool use face recognition culture cooperation and reconciliation with critical commentaries on conservation and welfare the collection aims to understand how chimpanzees learn think and feel so that researchers can not only gain insight into the origins of human cognition but also crystallize collective efforts to protect wild chimpanzee populations and ensure appropriate care in captive settings With a breadth of material on cognition and culture from the lab and the field The Mind of the Chimpanzee is a first rate synthesis of contemporary studies of these fascinating mammals that will appeal to all those interested in animal minds and what we can learn from them

Titans of the Forests Gregory V. Short, 2020-10-06 Instead of dwelling on the biological physiological or even the genetic aspects of our evolution Titans of the Forests takes a completely different approach which could be referred to as the unchartered and neglected field of macroevolution Uniquely captivating controversial and very readable it is the author's contention that we as a species were continuously forced to change our way of obtaining nourishment or rather our various economies in order to adapt to the ever changing world And as a result of this economic adaptation our species would then and only then begin to slowly change into the modern humans of today For much too long the world's scientific community has directed the discussion of our incredible evolution As a matter of fact our species biological physiological psychological and cultural evolution has been instigated propelled and shaped by our economic adaptation to a fluctuating environment In a very real sense the scientists are so far into the trees that they have actually ignored the forest Consequently we teach human evolution as a hodgepodge of different theories within the realm of microevolution thus failing to understand or even to recognize the economic thread that binds them altogether By integrating the timeline of our prehistoric past with that of our earliest known economies food gathering scavenging and nomadism the author was able to synthesize a sequence of events that illustrates the economic basis of our remarkable ascension and the beginnings of our present day institutions He not only reveals the genesis behind the cultural forces that exist within every human society but for the first time he has created a systematic and holistic approach in explaining the how and the why we have economically physiologically and then culturally evolved For unlike the rest of the animal kingdom we have possessed the extraordinary ability to change our economy which has made us an extremely adaptable species

Woman's Inhumanity to Woman Phyllis Chesler, 2009-05-01 Drawing on the most

important studies in psychology human aggression anthropology and primatology and on hundreds of original interviews conducted over a period of more than 20 years this groundbreaking treatise urges women to look within and to consider other women realistically ethically and kindly and to forge bold and compassionate alliances Without this necessary next step women will never be liberated Detailing how women s aggression may not take the same form as men s this investigation reveals through myths plays memoir theories of revolutionary liberation movements evolution psychoanalysis and childhood development that girls and women are indeed aggressive often indirectly and mainly toward one another This fascinating work concludes by showing that women depend upon one another for emotional intimacy and bonding and exclusionary and sexist behavior enforces female conformity and discourages independence and psychological growth The Chimpanzees of the Mahale Mountains Toshisada Nishida,1990 *Evolutionary Perspectives on Human Reproductive Behavior* Dori LeCroy,Peter Moller,2000 A central aspect of human adaptation reproductive behaviour is studied through the multiple lenses of philosophy biology psychology and anthropology all united by an evolutionary perspective Although reproduction is an intrinsic mechanism of evolution this colloquium shows that reproductive behaviours yield new significance for evolution theory when re examined in a multidisciplinary setting This volume focuses on explication of the adaptive evolved nature of our own reproduction with topics such as how mate choice shaped human nature symmetry in mate selection the evolution of moral dispositions and the sexist order of the bonobos This look at reproduction as a mechanism of human evolution reveals underlying physiologic mechanisms as well as comparative and interesting cross cultural aspects that emerge from social sciences and anthropology

THE SOCIOECOLOGY OF WILD CHIMPANZEE VOCAL BEHAVIOR IN THE KIBALE FOREST, UGANDA (PRIMATE SOCIAL BEHAVIOR). ADAM PETER. CLARK,1991 Patterns of female and male social relationships among the Kibale chimpanzees a rain forest population were similar to those reported at the woodland sites of Gombe and Mahale in Tanzania This result differed from earlier findings on other rain forest chimpanzee populations
