## **The Chimps Of Mt Asserik:**

**The Chimps of Mt. Asserik** Stella Margaret Brewer,1978      **The Chimpanzees of Rubondo Island** Josephine Nadezda Msindai,Volker Sommer,2022-10-05 How did a random batch of chimpanzees come to populate a small island in Tanzania where apes had never lived before Combining information gathered from fieldwork laboratory and archival research this book tells the unique story of chimpanzee babies taken from their forest homes in West Central Africa and sold to European zoos and circuses to then be shipped to Lake Victoria and set free on Rubondo Island These founder animals learnt what to eat how to build nests to breed and raise young ultimately forming a chimpanzee typical fission fusion society that today is thriving The authors compare the ecology behaviour and genetics of the Rubondo population with communities of wild chimpanzees providing exciting insights into how our closest relatives adjust to changing environments At the same time a reconstruction of the historical context of the Rubondo experiment reflects on its chequered colonial heritage and the introduction is viewed against current threats to the survival of apes in their natural habitats The book will be of interest to scholars and professionals working in primatology animal behaviour conservation biology and postcolonial studies

*Chimpanzees, War, and History* R. Brian Ferguson,2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill      **The Cultured Chimpanzee** W. C. McGrew,2004-10-21 Publisher Description

**Best Practice Guidelines for the Re-Introduction of Great Apes** Benjamin Beck,2007 From the website Although the IUCN has previously established working protocols for plant and animal re introduction the great apes present unique challenges and concerns owing to their singular cognitive development This prompted the Primate Specialist Group to reconsider the existing guidelines in terms of the specific needs of great apes The resulting synthesis representing the expert opinion of primatologists and re introduction practitioners is presented here as part of the series of best practices documents Specifically designed for rehabilitators and specialists in re introduction these guidelines start from the fundamental assumption that re introductions should not endanger wild populations of great apes or the ecosystems they inhabit Equally important is the health and welfare of the individual great apes being re introduced as well as the caretaker staff and the residents of the surrounding areas The re introduction guidelines also require that the factors which first threatened great apes in the proposed site of release have been addressed and resolved      [The Extinction of Sivapithecus](#) Sherry Nelson,2021-11-15 Sherry V Nelson examines the adaptations and extinction of Sivapithecus a Miocene hominoid in the

Siwaliks of Pakistan Three different studies involving dental microwear and stable isotopic analyses are interwoven to provide reconstructions of the preferred landscape climate and diet of Sivapithecus as well as changes in the environment that led to its extinction This book presents new techniques that allow for a more detailed analysis of faunal and environmental change than ever before documented for an ape clade throughout its radiation and demise **New York Court of Appeals. Records and Briefs.** New York (State)., *The Mind of the Chimpanzee* Elizabeth V. Lonsdorf, Stephen R. Ross, Tetsuro Matsuzawa, 2010-08-15 Understanding the chimpanzee mind is akin to opening a window onto human consciousness Many of our complex cognitive processes have origins that can be seen in the way that chimpanzees think learn and behave *The Mind of the Chimpanzee* brings together scores of prominent scientists from around the world to share the most recent research into what goes on inside the mind of our closest living relative Intertwining a range of topics including imitation tool use face recognition culture cooperation and reconciliation with critical commentaries on conservation and welfare the collection aims to understand how chimpanzees learn think and feel so that researchers can not only gain insight into the origins of human cognition but also crystallize collective efforts to protect wild chimpanzee populations and ensure appropriate care in captive settings With a breadth of material on cognition and culture from the lab and the field *The Mind of the Chimpanzee* is a first rate synthesis of contemporary studies of these fascinating mammals that will appeal to all those interested in animal minds and what we can learn from them **Eating Apes** Dale Peterson, 2003-05-01 *Eating Apes* is an eloquent book about a disturbing secret the looming extinction of humanity's closest relatives the African great apes chimpanzees bonobos and gorillas Dale Peterson's impassioned expos details how with the unprecedented opening of African forests by European and Asian logging companies the traditional consumption of wild animal meat in Central Africa has suddenly exploded in scope and impact moving from what was recently a subsistence activity to an enormous and completely unsustainable commercial enterprise Although the three African great apes account for only about one percent of the commercial bush meat trade today's rate of slaughter could bring about their extinction in the next few decades Supported by compelling color photographs by award winning photographer Karl Ammann *Eating Apes* documents the when where how and why of this rapidly accelerating disaster *Eating Apes* persuasively argues that the American conservation media have failed to report the ongoing collapse of the ape population In bringing the facts of this crisis and these impending extinctions into a single accessible book Peterson takes us one step closer to averting one of the most disturbing threats to our closest relatives **The New Yorker** Harold Wallace Ross, Katharine Sergeant Angell White, 1978-10 **Understanding Chimpanzees** Paul G. Heltne, Linda A. Marquardt, 1989 Thanks to classic studies such as Jane Goodall's *The Chimpanzees of Gombe* we know a great deal about our closest primate relative but much remains to be discovered about these endlessly fascinating family members Even their genus name *Pan* taken from the Greek god who represented the spirit of nature aptly characterizes their elusiveness for like nature chimpanzee behavior is a giant jigsaw

puzzle as Goodall puts it This book a definitive summary of current knowledge about chimpanzees and bonobos is a significant step toward solving the puzzle Virtually every major chimpanzee specialist from around the world Japan the Netherlands Great Britain Africa the United States has contributed to this landmark volume It contains important contributions by Japanese researchers who have been working in Africa for as many years as Goodall and whose work is not readily accessible in the West Understanding Chimpanzees examines a wide range of topics including social behavior and ecology in the field the rich variety of cultural traditions between one population and another in Africa and elsewhere behavior in captivity and the incredible cognitive abilities of chimpanzees in language acquisition laboratories Of special interest is the strong coverage of bonobos pygmy chimpanzees The authors also concentrate on conveying a better appreciation of chimpanzee intelligence through the description of various ongoing investigations particularly ones that examine signing interactions vocabulary testing and modulation and symbol acquisition In addition to the Foreword Jane Goodall contributes a review of her own work at Gombe her proposal for a ChimpanZoo project and an update on the status of conservation in Tanzania The book contains a major section on chimpanzee conservation in captivity and in the wild documenting the threat to chimpanzee habitat and survival This work draws from a broad range of disciplines including ethology psychology anatomy biology anthropology conservation and ecology and will attract readers pursuing ideas in all these fields Over 100 photographs and drawings illustrate the text which has been carefully assembled and edited by Paul G Heltne Director of the Chicago Academy of Sciences and Linda A Marquardt the editor of Science Learning in the Informal Setting **Re-introduction News** ,2000 **Reviews** Young Adults Cooperative Book Review Group of Massachusetts,1978

**The Ethological Roots of Culture** R. Allen Gardner,1994 If culture is grounded in human biology then it has an evolutionary history and rudimentary aspects of culture should be detectable in the behaviour of other modern species In this volume ethological investigators and biologically oriented anthropologists examine new discoveries in the transmission of behaviour in social groups and across generations and focus on the theme of the ethological roots of culture **Natural History** ,1978 Explaining how to implement a cause marketing program the author joins with the organization Business for Social Responsibility and discusses never before published case studies of companies which sought to build their image and bottom line through socially responsible partnerships programs and events Visions of Caliban Dale Peterson,1993 The authors explore the image of Caliban created by William Shakespeare as neither man nor beast but honored with a human shape as they present the humanity of chimpanzees our inhumanity toward them and the poignancy of our relationships with them **The Multimedia Guide to the Non-human Primates** Frances D. Burton,1995 This text references the natural history of each of the more than 200 species of non human primates The text may be used for self directed learning or as a reference for the reader Three major headings Attributes Ecology and Social Behavior Includes fossil records food and diet communication taxonomy and social dynamics Field Primatology Linda D. Wolfe,1987 *Folia Primatologica* ,1990

*Cumulative Book Review Digest ,1986*
