grasp the whole at once Instead of arranging objects along a time axis as language does the lemma intellect perceives the world in an intuitive non linear and non causal manner comprehending the whole in an instant This book embarks on a venture to establish a new science based upon the lemma intellect Using non logos based materials rigorously following lemma based methods and transgressing the boundaries of academic fields Nakazawa seeks to construct this new science as a fluid dynamic entity This book will be of great interest to researchers across the fields of Japanese studies Buddhist studies psychology and linguistics

Handbook of Intelligence Benjamin B. Wolman,1985-10-10 The first work to cover the entire field of intelligence from historical beginnings through conceptual and practical development to the latest research Experts in the field describe various theories on intelligence from a historical perspective Then they discuss methods of measurement and controversial issues concerning the use of intelligence tests in clinical and educational fields The final chapters cover the application of intelligence tests in every possible area
