Crowning Glory Matthew Allen,2024-07-19 As a nation we like to think we know everything about our Kings and Queens. William I conquered in 1066, Henry VIII had six wives and Queen Victoria was not amused. But do these pub quiz facts provide a genuine picture of what our monarchs were really like as living, breathing people? As the reader shall find, there is a treasure trove of wit, wisdom and wonder waiting to be discovered. *Crowning Glory* wipes away the cobwebs of fuddy-duddy facts and breathes new life into this surprisingly addictive aspect of history. It challenges our basic understanding of the subject by introducing readers to a colourful cast of characters and revealing little-known insights. This book reminds us that behind the formality of the crown are real human beings. Like you and me, they have known success, failure, sorrow and laughter. The lives of our kings and queens are so much more vivid than boring old dates, figures and facts.

Fire and Blood Diane Morgan, 2007-11-30. The ruby is the world's most precious and rare stone. For the ancient Hindus, the ruby was Rajnapura, the Gem of Gems, at whose heart surges an eternal unquenchable flame. Yet for all its rarity and beauty, the ruby has always been a slightly sinister stone. Indian legend says the ruby was born from the blood of a demon. Indeed, the ruby is very close to a wild living being: fiery, passionate, and dangerous. It has been at the center of love and wars, a symbol of passion, greed, and strong magic. Ancient sages and modern crystal healers have credited it with strange powers, from the granting of prophetic insight to protecting one from bullets. It has long been part of the human journey, coveted, fought over, and feared.

Morgan considers all the beautiful and terrifying facets of this magnificent stone: scientific, economic, mythological, and spiritual. She discusses the great stones and great heists of the ruby world and the famous fakes too: the great Black Prince and renowned Timur. She closes with a discussion of the making of synthetic rubies and the laser beam.
