The Suicide Machine:

The Suicide Machine Douglas N. R. Thompson, 2018 **An Aesthesia of Networks** Anna Munster, 2013-05-17

The experience of networks as the immediate sensing of relations between humans and nonhuman technical elements in assemblages such as viral media and databases Today almost every aspect of life for which data exists can be rendered as a network Financial data social networks biological ecologies all are visualized in links and nodes lines connecting dots A network visualization of a corporate infrastructure could look remarkably similar to that of a terrorist organization In *An Aesthesia of Networks* Anna Munster argues that this uniformity has flattened our experience of networks as active and relational processes and assemblages She counters the network anaesthesia that results from this pervasive mimesis by reinserting the question of experience or aesthesia into networked culture and aesthetics Rather than asking how humans experience computers and networks Munster asks how networks experience what operations they perform and undergo to change and produce new forms of experience Drawing on William James's radical empiricism she asserts that networked experience is assembled first and foremost through relations which make up its most immediately sensed and perceived aspect Munster critically considers a range of contemporary artistic and cultural practices that engage with network technologies and techniques including databases and data mining the domination of search in online activity and the proliferation of viral media through YouTube These practices from artists who undermine data to musicians and VJs who use intranetworked audio and video software environments are concerned with the relationality at the core of today's network experience

Disconnect Tero Karppi, 2018-10-16 An urgent examination of the threat posed to social media by user disconnection and the measures websites will take to prevent it No matter how pervasive and powerful social media websites become users always have the option of disconnecting right Not exactly as Tero Karppi reveals in this disquieting book Pointing out that platforms like Facebook see disconnection as an existential threat and have undertaken wide ranging efforts to eliminate it Karppi argues that users ability to control their digital lives is gradually dissipating Taking a nonhumancentric approach Karppi explores how modern social media platforms produce and position users within a system of coded relations and mechanisms of power For Facebook disconnection is an intense affective force It is a problem of how to keep users engaged with the platform but also one of keeping value attention and desires within the system Karppi uses Facebook's financial documents as a map to navigate how the platform sees its users Facebook's plans to connect the entire globe through satellites and drones illustrates the material webs woven to keep us connected Karppi analyzes how Facebook's interface limits the opportunity to opt out even continuing to engage users after their physical death Showing how users have fought to take back their digital lives Karppi chronicles responses like Web2.0 Suicide Machine an art project dedicated to committing digital suicide For Karppi understanding social media connectivity comes from unbinding the bonds that stop people from leaving these platforms Disconnection brings us to the limit of user policies algorithmic control and platform

politics Ultimately Karppi's focus on the difficulty of disconnection rather than the ease of connection reveals how social media has come to dominate human relations

The Suicide Machine Ron Dzwonkowski, 1997 From the Back Cover Perhaps only Bill Clinton has greater name recognition But of the millions who know Jack Kevorkian's name only a handful have understood how Dr Death works until now In a marathon reporting effort that spanned more than a half a year and hundreds of interviews the staff of the Detroit Free Press took readers inside the lives and the issues The result this authoritative account of Kevorkian's crusade as related by those who witnessed it death by death is a sometimes poignant sometimes deeply disturbing journey to the center of medicine's profound dilemma

The Inevitable Katie Engelhart, 2021-03-02 A remarkably nuanced empathetic and well crafted work of journalism The Inevitable explores what might be called the right to die underground a world of people who wonder why a medical system that can do so much to try to extend their lives can do so little to help them end those lives in a peaceful and painless way Brooke Jarvis The New Yorker More states and countries are passing right to die laws that allow the sick and suffering to end their lives at pre planned moments with the help of physicians But even where these laws exist they leave many people behind The Inevitable moves beyond margins of the law to the people who are meticulously planning their final hours far from medical offices legislative chambers hospital ethics committees and polite conversation It also shines a light on the people who help them loved ones and sometimes clandestine groups on the Internet that together form the euthanasia underground Katie Engelhart a veteran journalist focuses on six people representing different aspects of the right to die debate Two are doctors a California physician who runs a boutique assisted death clinic and has written more lethal prescriptions than anyone else in the U S an Australian named Philip Nitschke who lost his medical license for teaching people how to end their lives painlessly and peacefully at DIY Death workshops The other four chapters belong to people who said they wanted to die because they were suffering unbearably of old age chronic illness dementia and mental anguish and saw suicide as their only option Spanning North America Europe and Australia The Inevitable offers a deeply reported and fearless look at a morally tangled subject It introduces readers to ordinary people who are fighting to find dignity and authenticity in the final hours of their lives

Inhuman Networks Grant Bollmer, 2016-08-11 Social media's connectivity is often thought to be a manifestation of human nature buried until now revealed only through the diverse technologies of the participatory internet Rather than embrace this view Inhuman Networks Social Media and the Archaeology of Connection argues that the human nature revealed by social media imagines network technology and data as models for behavior online Covering a wide range of historical and interdisciplinary subjects Grant Bollmer examines the emergence of the network as a model for relation in the 1700s and 1800s and follows it through marginal often forgotten articulations of technology biology economics and the social From this history Bollmer examines contemporary controversies surrounding social media extending out to the influence of network models on issues of critical theory politics popular science and neoliberalism By moving through the past and present of network media Inhuman

Networks demonstrates how contemporary network culture unintentionally repeats debates over the limits of Western modernity to provide an idealized future where the human is interchangeable with abstract flowing data connected through well managed distributed networks

The Logic of Intersubjectivity Darren M. Slade, 2020-08-27 To survey harsh criticisms against Brian Douglas McLaren 1956 readers gain the inaccurate impression that he is a heretical relativist who denies objective truth and logic While McLaren s inflammatory and provocative writing style is partly to blame this study also suspects that his critics base much of their analyses on only small portions of his overall corpus The result becomes a caricature of McLaren s actual philosophy of religion What is argued in this book is that McLaren s philosophy of religion suggests a faith based intersubjective relationship with the divine ought to result in an existential appropriation of Christ s religio ethical teachings When subjectively internalized this appropriation will lead to the assimilation of Jesus kingdom priorities thereby transforming the believer s identity into one that actualizes Jesus kingdom ideals The hope of this book is that by tracing McLaren s philosophy of Christian religion future researchers will not only be able to comprehend and perhaps empathize with McLaren s line of reasoning but they will also possess a more nuanced discernment of where they agree and disagree with his overall rationale

The Right to Die? Mark Blocher, 1999 The Right to Die challenges us to accept that there is no disgrace in human mortality that human dignity can be cared for and respected in the midst of life s worst experiences Mark suggests that Christians must become proactive in providing alternatives to assisted suicide and euthanasia while offering at least three promises to the terminally ill person to the best of our ability we will not allow you to die in pain we will not allow you to die alone you will not be a burden to anyone
