

A Unique Person And What It Means

Uniqueness, at its core, is the embodiment of characteristics and experiences that distinctly set one apart from the masses.

The Unique Individual

Simon Skempton

The Unique Individual:

The Rationality of Love Hichem Naar, 2022 Hichem Naar argues for the rationality of love it belongs to the class of responses such as belief and action that are subject to norms of justification and rationality There are reasons to love others reasons provided by the unique value of each individual **Philosophy of Nursing** Janice M. Brencick, Glenn A. Webster, 2000-01-01 Employs philosophy to help illuminate the nature of nursing and provide a holistic view of both nursing and persons **The Self and The Other** Anna-Teresa Tymieniecka, 1977-06-30 The World and the Individual Josiah Royce, 1901 **Alienation After Derrida** Simon Skempton, 2010-03-16 Alienation After Derrida rearticulates the Hegelian Marxist theory of alienation in the light of Derrida's deconstruction of the metaphysics of presence Simon Skempton aims to demonstrate in what way Derridian deconstruction can itself be said to be a critique of alienation In so doing he argues that the acceptance of Derrida's deconstructive concepts does not necessarily entail the acceptance of his interpretations of Hegel and Marx In this way the book proposes radical reinterpretations not only of Hegel and Marx but of Derridian deconstruction itself The critique of the notions of alienation and de-alienation is a key component of Derridian deconstruction that has been largely neglected by scholars to date This important new study puts forward a unique and original argument that Derridian deconstruction can itself provide the basis for a rethinking of the concept of alienation a concept that has received little serious philosophically engaged attention for several decades Max Weber and Charles Peirce Basit Bilal Koshul, 2014-02-07 Max Weber and Charles Peirce At the Crossroads of Science Philosophy and Culture shows that a relational conception of science is implicit in Max Weber's reflections on scientific inquiry as a bridge between the Geisteswissenschaften soft sciences and Naturwissenschaften hard sciences Because he is not a trained philosopher Weber does not have the precise philosophical language in which to articulate his ideas clearly Consequently his relational vision of science remains obscure Basit Bilal Koshul brings clarity and precision to Weber's insights using the pragmatist philosophy of Charles Peirce He makes explicit the phenomenology semiotics and logic that are implicit in Weber's methodological writings and translates them into Peircean terms Since Peirce explicitly offers his philosophy of science as a critique of the modern divide between the humanistic and natural sciences and of the divide between religion and science this translation has a double effect It clarifies Weber's insights on the methodology of scientific inquiry and it extends the reparative force of these insights into the larger culture of which science is one part The reconstruction of Weber's relational conception of science along the lines of Peirce's pragmatism in turn reveals that Weber's work points toward deep affinities between religion and science Given the fact that the same phenomenology semiotics and logic that underpin Peirce's philosophy of science are also at the root of his philosophy of religion we can begin to appreciate the fact that Weber's work makes an important contribution to bridging the divide between religion and science In providing models that bridge divides and move towards complementary relationships Weber and Peirce not only help us to better understand disenchantment as

the fate of our times but also offer uniquely valuable resources to reach for cultural horizons that lie beyond it

The World and the Individual: Nature, man, and the moral order Josiah Royce, 1901 *The Language Parallax* Paul Friedrich, 2014-04-15

Humankind has always been fascinated and troubled by the way languages and dialects differ. Linguistically based differences in point of view have preoccupied many original minds of the past such as Kant and remain at the forefront of language study in philosophy, anthropology, literary criticism and other fields. Paul Friedrich's *The Language Parallax* argues persuasively that the locus and focus of differences among languages lies not so much in practical or rational aspects as in the complexity and richness of more poetic dimensions in the nuances of words or the style and voice of an author. This poetic reformulation of what has been called linguistic relativism is grounded in the author's theory of the imagination as a main source of poetic indeterminacy. The reformulation is also based on the intimate relation of the concentrated language of poetry to the potential or possibilities for poetry in ordinary conversation, dreams and other experiences. The author presents challenging thoughts on the order and system of language in their dynamic relation to indeterminacy and ultimately disorder and chaos. Drawing on his considerable fieldwork in anthropology and linguistics, Friedrich interweaves distinct and provocative elements: the poetry of language difference, the indeterminacy in dialects and poetic forms, the discovery of underlying orders, the workings of different languages, the strength of his own poetry. The result is an innovative and organic whole. *The Language Parallax* then is a highly original work with a single bold thesis. It draws on research and writing that has involved in particular English, Russian and the Tarascan language of Mexico, as well as the personal and literary study of the respective cultures. Anthropologist, linguist and poet Friedrich synthesizes from his experience in order to interrelate language variation and structure, the creative individual ideas of system in process and questions of scientific and aesthetic truth. The result is a new view of language held to the light of its potentially creative nature.
