Trends Kōbe Daigaku. Shizen Kagaku Kenkyūka, 1999 **Data Communications**, 1996 [Signal Processing Advances in Wireless and Mobile Communications: Trends in single-user and multi-user systems](#) Georgios B. Giannakis, 2001 This is the second in a two volume set that captures major recent advances in signal processing SP tools as they apply to wireless and mobile communication systems. The set brings together contributions by leaders in the field worldwide and covers an exceptionally wide range of technologies and methodologies including noise and interference cancellation modem design mobile Internet services next generation audio video broadcasting cellular telephony and wireless multimedia networks. Volume II focuses on single and multi user communication systems. Volume II presents valuable new signal processing work on blind synchronization with single and multi sensor arrays space time transmit receive diversity combining systems time varying channel modeling signal separation with constant modulus constraints and parallel factor analysis tools. Volume II also presents important advances in multiuser systems notably modern methods for canceling multiuser interference and mitigating multipath effects in CDMA and multicarrier systems at the physical layer as well as signal processing issues at the network layer. *Trends and Applications*, 1976 *Technology-mediated Communication* Urs E.
