The Child Reality:

The Child's Reality D. Elkind, 2014-05-22 First published in 1978 Focusing essentially on his own research and clinical observations David Elkind the clinician researcher and educator has in these lectures both extended and further refined and defined the significance and utility of Piagetian concepts in understanding infant child and adolescent development

The Reality - Fiction Opposition in Children's Literature Adrian Zagler, 2011 Bachelor Thesis from the year 2010 in the subject English Language and Literature Studies Literature grade 1 University of Graz language English abstract Since the 1970s scholarly interest in children's literature has grown and numerous studies looking into the complexity and thematic and structural depth of the texts have been published Simultaneously the notion of metareferentiality has sparked interest among scholars from various disciplines Metareferentiality though not unique to the twentieth and the twenty first centuries is said to be one of the key cultural phenomena of our time And yet these two fields of interest namely children's literature and metareferentiality have only very rarely been studied in the same context Metareferential elements in children's books are often seen as phenomena of dream worlds Thus they allow a traditional non critical reading in which the metareferential elements do not necessarily trigger medial awareness in the readers but can be explained logically and within the framework of the represented story worlds Consequently the epistemological status of reality would not be threatened by these texts However as this paper aims to prove such a reading for instance of the Alice stories *Die Unendliche Geschichte* and *The Book of Lost Things* although undeniably possible falls short of the true scope of the texts As will be shown all four books address the question of the status of fiction with reference to its opposition to reality albeit in different ways In their treatment of the subject they are clearly metafictional texts with epistemological and ontological concerns that require experienced readers to fully grasp their messages Nevertheless they are still publicly perceived as children's literature and are enjoyed by children and adults alike After some general remarks on the genre of children's literature and on metareferentiality this paper focuses on a particular form of metareference
