The Structure Of Writing:

Fun-Size Academic Writing for Serious Learning Gretchen Bernabei, Judi Reimer, 2013-07-31 Sometimes a student's best teacher is another student. If ever there were a book to respond to the pressure to increase students' test scores, this is it. You see, Gretchen Bernabei and Judi Reimer have had amazing success using mentor texts by students to teach writing well in any genre. Now they hand over their file drawers and pair 101 student essays with one-page lessons on topics such as how to choose a structure across genres, extract thesis statement and main points, support points with details, use rhetorical devices and grammatical constructions, write from the point of view of a fictional character. *The Theory and Practice of Technical Writing* Samuel Chandler Earle, 1911 Teaching Writing Ann Browne, 1999 This title by Ann Browne focuses on the teaching of writing at Key Stage 1 and before and fully addresses the National Literacy Strategy at this level. The text fully reflects the requirements of the ITT National Curriculum whilst addressing the latest research findings on the development of literacy skills in the primary years. A History of the Art of Writing William Albert Mason, 1920

A Theory of Narrative Drawing Simon Grennan, 2017-06-29 This book offers an original new conception of visual story telling, proposing that drawing, depictive drawing and narrative drawing are produced in an encompassing dialogic system of embodied social behavior. It refigures the existing descriptions of visual story telling that pause with theorizations of perception and the articulation of form. The book identifies and examines key issues in the field, including the relationships between vision, visualization and imagination, the theoretical remediation of linguistic and narratological concepts, the systematization of discourse, the production of the subject, idea and institution, and the significance of resources of the body in depiction, representation and narrative. It then tests this new conception in practice: two original visual demonstrations clarify the particular dialectic relationships between subjects and media in an examination of drawing style and genre, social consensus and self-conscious constraint. The book's originality derives from its clear articulation of a wide range of sources in proposing a conception of narrative drawing and the extrapolation of this new conception in two new visual demonstrations.
