Political and economic drivers of Sudan's armed conflict: Implications for the agri-food system Abushama, Hala, Resnick, Danielle, Siddig, Khalid, Kirui, Oliver K., 2023-10-27 This study assesses the political economy of the conflict between the Sudan Armed Forces SAF and the Rapid Support Forces RSF that brought out in April 2023 resulting in massive violence displacement and threats to food security Based on a series of key informant interviews and other secondary materials this study identifies that the primary underlying driver of the conflict relates to the rise of competition between the SAF and RSF over productive resources including within the agri food system This scenario has been facilitated by a longstanding lack of scrutiny accountability and transparency over the distribution of economic rents and commercial holdings between the two factions Additionally the capture of rents from different industries and resources has been a key contributor to the geographic expansion of the conflict As the conflict continues to rage between the two groups and their associates it continues to impose considerable impacts on different actors within the agri food system posing significant challenges to the planting season and crop production introducing blockades of trade routes and a near cessation of agro processing We discuss these aspects of the ensuing conflict in view of the uncertainty about political and economic developments and propose policy recommendations for rebuilding Sudan's agri food system holistically under different scenarios

The Sudan John Obert Voll, Sarah Potts Voll, 2016-10-04 Little known in the United States and Western Europe the Sudan is nevertheless a country of major importance in international affairs This analytic introduction to the modern Sudan first published in 1985 provides a summary of the basic dynamics of the country's political social cultural and economic life as well as a general framework for interpreting the modern Sudanese experience The authors present a clear

picture of the Sudan as a distinctive entity with an identity all its own revealing however that almost paradoxically one of the most significant aspects of that identity is the place of the Sudan as a special link between different cultural patterns and socio political styles The Sudan is both a bridge and a melting pot and this provides the foundation of its unique character
