Freud's Early Psychoanalysis, Witch Trials and the Inquisitorial Method Kathleen Duffy, 2019-11-07 In *Freud's Early Psychoanalysis Witch Trials and the Inquisitorial Method* The Harsh Therapy author Kathleen Duffy asks why Freud compared his hysterical patients to the accused women in the witch trials and his psychoanalytical treatment to the inquisitorial method of their judges He wrote in 1897 to Wilhelm Fliess I understand the harsh therapy of the witches judges This book proves that Freud's view of his method as inquisitorial was both serious and accurate In this multidisciplinary and in depth examination Duffy demonstrates that Freud carefully studied the witch trial literature to develop the supposed parallels between his patients and the witches and between his own psychoanalytic method and the judges inquisitorial extraction of confessions by torture if necessary She examines in meticulous detail both the witch trial literature that Freud studied and his own case studies papers letters and other writings She shows that the various stages of his developing early psychoanalytic method from the Katharina case of 1893 through the so called seduction theory of 1896 and its retraction to the Dora case of 1900 were indeed in many respects inquisitorial and invalidated his patients experience This book demonstrates with devastating effect the destructive

consequences of Freud's nineteenth century inquisitorial practice. This raises the question about the extent to which his mature practice and psychoanalysis and psychotherapy today despite great achievements remain at times inquisitorial and consequently untrustworthy. This book will therefore be invaluable not only to academics practitioners and students of psychoanalysis psychotherapy literature history and cultural studies but also to those seeking professional psychoanalytic or psychotherapeutic help.

Case Studies and the Dissemination of Knowledge Joy Damousi, Birgit Lang, Katie Sutton, 2015-02-11. The case study has proved of enduring interest to all Western societies particularly in relation to questions of subjectivity and the sexed self. This volume interrogates how case studies have been used by doctors lawyers psychoanalysts and writers to communicate their findings both within the specialist circles of their academic disciplines and beyond to wider publics. At the same time it questions how case studies have been taken up by a range of audiences to refute and dispute academic knowledge. As such this book engages with case studies as sites of interdisciplinary negotiation transnational exchange and influence exploring the effects of forces such as war migration and internationalization. *Case Studies and the Dissemination of Knowledge* challenges the limits of disciplinary based research in the humanities. The cases examined serve as a means of passage between disciplines genres and publics from law to psychoanalysis and from auto biography to modernist fiction. Its chapters scrutinize the case study in order to sharpen understanding of the genre's dynamic role in the construction and dissemination of knowledge within and across disciplinary temporal and national boundaries. In doing so they position the case at the center of cultural and social understandings of the emergence of modern subjectivities.

"The" Trial(s) of Psychoanalysis Françoise Meltzer, 1987. The Madness of Women Jane M. Ussher, Jane Ussher, 2011-03-28. Nominated for the 2012 Distinguished Publication Award of the Association for Women in Psychology. Why are women more likely to be positioned or diagnosed as mad than men? If madness is a social construction a gendered label as many feminist critics would argue how can we understand and explain women's prolonged misery and distress? In turn can we prevent or treat women's distress in a non pathologising women centred way? *The Madness of Women* addresses these questions through a rigorous exploration of the myths and realities of women's madness. Drawing on academic and clinical experience

including case studies and in depth interviews as well as on the now extensive critical literature in the field of mental health Jane Ussher presents a critical multifactorial analysis of women s madness that both addresses the notion that madness is a myth and yet acknowledges the reality and multiple causes of women s distress Topics include The genealogy of women s madness incarceration of difficult or deviant women Regulation through treatment Deconstructing depression PMS and borderline personality disorder Madness as a reasonable response to objectification and sexual violence Women s narratives of resistance This book will be of great interest to students and scholars of psychology gender studies sociology women s studies cultural studies counselling and nursing
