The Structure of Game Design Wallace Wang, 2023-07-21 The Structure of Game Design is designed to help aspiring and existing game designers turn their ideas into working games Creating a game

involves understanding the core foundational elements of all types of games from paper based games to the latest video games By understanding how these core principles work in all types of games you can apply these same principles to design your own game Games are about goals structure play and fun While everyone will always have their own idea of what might be fun any game designer can maximize player enjoyment through meaningful choices that offer various risks and rewards Such challenges combined with rules and limitations force players to overcome obstacles and problems using a variety of skills including dexterity puzzle solving intelligence and strategy Essentially games allow players to venture forth into new worlds and overcome problems in a safe but exciting environment that allows them to triumph in the end Just as playing games have proven popular around the world to all ages genders and cultures so has game designing proven equally popular Games can challenge players to make the best move solve puzzles engage in combat manage resources and tell stories By understanding how randomness psychology and balance can change the way games play readers can decide what game elements are best for their own game creation Whether your goal is to make money learn something new make a social statement improve on an existing game idea or challenge your artistic programming or design skills game design can be just as much fun as game playing By knowing the parts of a game how they work how they interact and why they re fun you can use your knowledge to turn any idea into a game that others can play and enjoy
