It is one of the most popular diets used nowadays. However, it is quite interesting to note that despite being called a diet, intermittent fasting is more about being an eating pattern. There is a huge difference between dieting and intermittent fasting. In most of the dieting patterns, you get to eat specific diets at specific times and schedules. In most of the diets, certain foods are to be taken in some portions, and some edibles are to be avoided. That is not the case in terms of intermittent fasting. There is really no restriction on what to eat and what to not consume. Although the method of intermittent fasting doesn't come with any side effects, it still needs to be done for long time to reap benefits. You can leave this peculiar eating pattern at any time without any harmful effects.
