judgments about others ourselves and our communities never seem to cease making their presence known in our minds Psychologically these initial assumptions and impressions that our mind receives are tactics our mind uses as a means of survival sometimes aligning with our intuition to help us determine what or who is going to be helpful or harmful But we must be careful here Our mind is equipped to handle countless sensations and thoughts and due to this we sometimes get so bogged down by this demanding busy world that we take the easy way out and make a judgment based solely on superficial knowledge without any deeper reflection or analysis The world is fast paced and although our mind does well to keep up it needs to be able to consciously recognize that our health both individual and as human beings is dependent on the strive to understand oneself and the other with empathy and compassion COVID 19 has shed a new spotlight on the increasing mental health crisis that is facing our world and I believe that one of the main causes is careless thinking that leads to quick assumptions to save oneself the time of research and contemplation Don't let others think for you Yes respect those with the authority to offer professional opinions but don't be a follower be a student and learn from every experience When your health seems to suffer don't assume the worst When someone comes at you the wrong way don't write them off as a heartless soul When you have a tough interaction with someone representing another community don't assume that everyone else is like that Instead look for the best in yourself others and the community There is the power behind the phrase Love thy neighbor When we treat every person that we come across as our neighbor we break down the prideful barriers that ABOUT DALLAS MCCLAIN Born in the USA Dallas is a passionate reader of theological and personal development books He is a devout Catholic Christian and enjoys time outdoors while being a tennis enthusiast He is the Chief Financial Officer and Editor of Biohackers Update Magazine and the co founder He holds a bachelor's degree in Biological Sciences as well as a TEFL level 5 certificate in teaching English He is currently living in Orlando Florida with his wife daughter and son where he enjoys writing sports and nature hikes in his free time Dallas can best be reached at his email dallas biohackersupdate com gmail com lead to alienation and instead open the gates to continued togetherness and participation in a loving community I think too often we as biohackers focus more on the physical side of things which is of course important but does not truly define what it means to be human The human person is a compositum of both mind and body Spiritual and Corporeal substance When biohacking ourselves let's remember to start with the intention of acting out of love for thyself of thy neighbor and of thy community There will always be disagreements between people but when we see the other person as our neighbor as another one of us so to speak we offer respect and extinguish any hatred and sinful intentions from the relationship thus creating a peaceful happier and more vibrant environment to foster a healthy mind that's prepared for whatever the onerous world throws at it *Biohacking, Bodies and Do-It-Yourself* Mirjam Grewe-Salfeld, 2021-11-05 From self help books and nootropics to self tracking and home health tests to the tinkering with technology and biological particles biohacking brings biology medicine and the material foundation of life into the sphere of do it yourself This trend has the

potential to fundamentally change people's relationship with their bodies and biology but it also creates new cultural narratives of responsibility, authority, and differentiation. Covering a broad range of examples, this book explores practices and representations of biohacking in popular culture, discussing their ambiguous position between empowerment and requirement, promise and prescription.
