Biohack Like a Woman Aggie Lal, 2024-09-26 THE INTERNATIONAL BESTSELLER AND LIFE CHANGING GUIDE Biohack Like a Woman written by health coach and biohacker Aggie Lal is a revolutionary approach to weight loss and biohacking that s made by a woman for women We live in a world where women are bombarded with weight loss information from every angle However most of that information is created by men that see shedding pounds from a male perspective They don t take into account the most important variable to us women our Infradian Rhythm Enter Biohack Like a Woman a tailor made way for you to lose all the weight you desire Not by counting calories but by biohacking your Infradian Rhythm otherwise known as your 28 day cycle As you probably know our cycles regulate our hormones and hormones regulate our hunger fat burning energy levels sleep quality and mood When we go on restrictive diets or bust our asses in the gym without being mindful of our hormones we are going against our own body s rhythm This is not a recipe book this is not an exercise

routine this isn't even a diet book. It's a blueprint on how to listen to your Infradian Rhythm and adapt the information you'll discover in the book to your own special circumstances which you can customize to you and your needs. And best of all you won't have to change your diet or lifestyle to achieve your goals because one of the key things you'll find out when you read the book is that when and how you eat is more important than what you eat. Best part: Biohack Like a Woman comes with a trained AI coach to help you digest everything in the book and help you better calibrate the biohacking protocol to your unique needs.

Transhumanism: Entering an Era of Bodyhacking and Radical Human Modification Emma Tumilty, Michele Battle-Fisher, 2022-09-29. This book surveys the distinctions that underlie the unbound potential and existential risks of life expansion and radical modifications posed by a transhuman world. Humanness is in flux as human bodies are being hacked and altered in their quest for super wellness, super intelligence, and super longevity. Now is the time to discuss how best to think about dealing with bodies that have been hacked to exceed natural physical limits or more technically, species-typical functioning. Enter the advent of transhumanism to take uncertainty by the horns. According to transhumanists, death is unnecessary and medical conventions undermine the possibility to radically evolve. To biohackers, there is no need to wait to explore the risks that conventional medicine dares not. This book is of interest to anyone interested in tapping into this growing movement of modifying the human body as it is right now.

Biohackers Magazine Issue 17, When one experiences a new product, a new treatment, or a new idea, there's little that compares to the feelings of excitement and hope that rush in, fueling one's faith in the upright direction of humanity. I just recently attended the 8th Annual Biohacking Conference hosted by Dave Asprey in LA, and like each biohacking event I left feeling inspired to say the least. Everything I saw, every person I met, and every biohack I experienced further fed my appetite to share these great ideas and practices with the world, a world hungry for the opposite approach of industrialized medicine. Now, of course, not every biohack is exactly 100% proven. Suffice it to say there are many that are still in the process of collecting data from studies and clinical trials. However, those that have stood up to the modern pill-popping regimes and have adamantly supported their ideas on the foundations of strong scientific data are truly examples to be held in high regard. I was impressed with the many products and companies at the conference that held a mission of dedicated service to fellow mankind. Yes, like in any startup industry or even industry for that matter, there are those who are looking to push some falsehood to scheme people into buying their product or services. But as we know, the companies that rise to the top are those that stick to the cardinal virtues that make up all of us: Prudence, Justice, Fortitude, and Temperance. The Biohacking Industry is outgrowing its mold, and soon a new layer of enthusiasts will be added. This is something that should enthrall us, but it shouldn't permit us to lose sight of the foundational attributes that make and will continue to make us biohackers for the rest of our lives. Essentially, we are all after freedom: freedom from disease, freedom from injury, freedom from hysteria, and freedom from aging. Responsible Biohacking is perhaps the best way towards that freedom, and we must continually adjust our sails to catch the winds that stem from truth and service. That is

what we at Biohackers Magazine strive towards serving the community through the provision of information carefully discerned and attuned to the values of sincerity and science

Biohacked Brandon J. Weichert,2023-05-16 When COVID 19 erupted from Wuhan China under mysterious circumstances the Communist Party of China covered up its existence for as long as possible It is now apparent that there is more to COVID than what the authorities wish for us to know *Biohacked*

China's Race to Control Life details the decades long pursuit by the Chinese Communists to dominate the biotechnology industry to control the very building blocks of life on Earth to further their political control at home and their supremacy abroad More appalling than the egregious cover up that China's rulers engaged in with COVID 19 is the fact that Western scientists pharmaceutical companies and research labs have contributed to China's rapid and dangerous growth in the biotech industry so much so that China not the United States may become the seat of the biotechnology industry The Chinese leadership believes that biotechnology is a critical industry for the Communist Party to achieve its China Dream of becoming the world's dominant superpower by 2049 In China's biotech sector truly macabre practices are being developed from ambitious cloning programs to the creation of potential pathogens that China's military plans to use in specific genetic attacks against Beijing's growing list of political enemies To stop the threat author Brandon J Weichert proposes the world's nations create a comprehensive set of treaties for regulating biotechnology research and development Further Weichert calls for Washington to slow the transfer of advanced biotechnology knowledge and funding from the United States to China using means like the Foreign Corrupt Practices Act and the Committee on Foreign Investment in the United States CFIUS Unless an all of government and society approach is taken to curbing irresponsible biotech development in China then another deadlier COVID 19 like pandemic could be at hand *Biohacking Ideas Are Written Here...
