Biodiversity Under Threat R E Hester,R M Harrison,2007-10-31 There is much public concern about threats to global biodiversity Industrial pollution changes in agricultural practices and climate change are all having a direct impact on biodiversity In this book the Editors provide a broad view of the many pressures imposed by human induced changes and the

many threats to global biodiversity and of the policy responses required to combat them This excellent text includes the work of some 44 authors and offers a solid description of the current understanding of threats to biodiversity with a range of illustrative examples a valuable point of reference for ecologists environmental scientists and students as well as policymakers and all other environmental professionals *Sustainability Indicators* Tomás Hák, Bedrich Moldan, Arthur Lyon Dahl, 2012-09-26 While the concept of sustainability has been widely embraced it has been only vaguely defined and is exceedingly difficult to measure Sustainability indicators are critical to making the broad concept of sustainability operational by providing specific measures by which decision makers and the public can judge progress Sustainability Indicators defines the present state of the art in indicator development It presents a comprehensive assessment of the science behind various indicators while placing special emphasis on their use as communications tools The contributors draw on their experience as academics and practitioners to describe the conceptual challenges to measuring something as complex as sustainability at local regional national and global scales The book also reviews existing indicators to assess how they could be better employed considering which indicators are overused and which have been underutilized Sustainability Indicators will help planners and policy makers find indicators that are ready for application and relevant to their needs and will help researchers identify the unresolved issues where progress is most urgently needed All readers will find advice as to the most effective ways to use indicators to support decision making

Urban Planning and Management Kenneth George Willis,R. Kerry Turner,Ian Bateman,2001 Urban Planning and Managementpresents a collection of key articles on different aspects of sustainability in urban planning and management whilst simultaneously illustrating the conflicting arguments about whether and how sustainability should be achieved Part I covers the factors determining the life and death of cities and what is required to achieve sustainable development In Part II issues of whether cities should be compact or dispersed and concepts of sustainable development in third world cities and societies are explored Parts III and IV examine design as an integral part of producing a sustainable urban policy and energy use Part V deals with Local Agenda 21 issues and Part VI looks at town planning Part VII discusses transport as both a

product and determinant of sustainable urban planning and management Parts VIII IX and X examine the sustainable provision of other services including waste collection recycling schemes and water In Part XI sustainability is shown as occurring within and constrained by legal property rights and management practices

Developing Indicators of Urban Sustainability Virginia Maclaren, Intergovernmental Committee on Urban and Regional Research (Canada), Canada Mortgage and Housing Corporation, Canada. State of the Environment Directorate, 1996 Having identified sustainability as an important goal municipalities and other levels of government are turning to the issue of how to measure a community's progress towards achieving this goal This report seeks to establish a methodology for developing sustainability indicators It begins with a discussion of alternative definitions of urban sustainability and then describes some of the general characteristics of indicators and indices Following a brief investigation of the meaning of sustainability indicators several potential indicator frameworks are examined including those which could be adapted from the work on state of the environment reporting quality of life reporting and healthy city reporting Next more detailed attention is given to appropriate criteria for identifying sustainability indicators and to the steps to be followed in applying those criteria A number of examples of potential indicators are then described and evaluated against the criteria Finally detailed case studies of urban sustainability reporting are presented as well as a brief description of sustainability reporting projects in British Columbia
