brought on by Russia's war. For example, the cost of the delivery of humanitarian assistance also peaked due to the increased cost of food and fuel for operations. At the same time, for countries hoping to address domestic food insecurity with domestic agricultural production, the increased cost of fertilizer became a limiting factor. Likewise, countries dealing with the high price of food imports, high prices of agricultural inputs, and high levels of food insecurity also had less fiscal space for social programs following the COVID-19 pandemic, which drained national budgets.

**Resurgent Russia** R. Reed Anderson, Patrick J. Ellis, Antonio M. Paz, Kyle A. Reed, Lendy "Alamo" Rodriguez, John T. Vaughan, 2017-11-21

Relations between the United States and Russia have recently escalated from strained to outright aggressive. From imperial expansion in Ukraine to intervention in Syria to Russian hacking during the US election in 2016, it is clear that the United States must be prepared to defend itself and its NATO allies against Russian aggression. *Resurgent Russia*, researched and written by six residents and internationally experienced officers at the US Army War College, analyzes the current threat of Russian acts of war, both conventional military attacks and unconventional cyber warfare or political attacks against the United States and NATO. The officers detail how the America can use its international military resources and political influence to both prepare for and deter aggression ordered by Vladimir Putin, making it clear that such an attack would be unsuccessful and therefore keeping the peace. This study provides a clear assessment of how the United States and its allies must utilize their political and military power to deter Russian aggression and maintain the hierarchy of power in today's world.

**Russian Exceptionalism between East and West** Kevork Oskanian, 2021-06-22

This monograph provides a novel long-term approach to the role of Russia's imperial legacies in its interactions with the former Soviet space. It develops Hybrid Exceptionalism as a critical conceptual tool aimed at uncovering the great power's self-positioning between East and West and its hierarchical claims over subalterns situated in both civilizational imaginaries. It explores how, in the Tsarist, Soviet, and contemporary eras, distinct civilizational spaces were created and maintained through narratives and practices emanating from Russia's ambiguous relationship with Western modernity and its partial identification with a subordinated Orient. The Romanov Empire's struggles with Russianness, the USSR's Marxism-Leninism, and contemporary Russia's combination of feigned liberal and civilizational discourses are explored as the basis of a series of successive civilising missions through an interdisciplinary engagement with official discourses, scholarship, and the arts. The book concludes with an exploration of contemporary policy implications for the West and the former Soviet states themselves.
