

Theories:	Realism	Liberalism	Idealism (Constructivism)
Core Beliefs	Self-interested states compete for power and security	Spread of democracy, global economic ties, and international organizations will strengthen peace	International politics is shaped by persuasive ideas, collective values, culture, and social identities
Key Actors in International Relations	States, which behave similarly regardless of their type of government	States, international institutions, and commercial interests	Promoters of new ideas, transnational activist networks, and nongovernmental organizations
Main Instruments	Military power and state diplomacy	International institutions and global commerce	Ideas and values
Theory's Intellectual Blind Spots	Doesn't account for progress and change in international relations or understanding that legitimacy can be a source of military power	Fails to understand that democratic regimes survive only if they safeguard military power and security; some liberals forget that transitions to democracy are sometimes violent	Does not explain which power structures and social conditions allow for changes in values
What the Theory Explains About the Post-9/11 World	Why the United States responded aggressively to terrorist attacks; the inability of international institutions to restrain military superiority	Why spreading democracy has become such an integral part of current U.S. international security strategy	The increasing role of polemics about values; the importance of transnational political networks (whether terrorists or human rights advocates)
What the Theory Fails to Explain About the Post-9/11 World	The failure of smaller powers to militarily balance the United States; the importance of non-state actors such as al Qaeda; the intense U.S. focus on democratization	Why the United States has failed to work with other democracies through international organizations	Why human rights abuses continue, despite intense activism for humanitarian norms and efforts for international justice

Williams, Tony Evans, Moorhead Wright, 1993 This reader has been assembled in response to increasing dissatisfaction among a growing number of international relations scholars with the currently dominant theory of realism as well as in recognition of the large number of newly independent states which are having to write new constitutions and develop foreign relations The book includes excerpts and essays from political theory and international relations which provide a starting point for further study of these subjects It draws together writings representing two distinct traditions and demonstrates their interconnections In political theory excerpts are drawn from classical texts which have an important bearing on problems of international relations In international relations the collection includes essays which have had a seminal influence on the development of this discipline The editors firmly believe that there is much to be learned from the interface between international relations and political theory and they argue that although regarded by some as two distinct fields their subject matter is one the nature of human conduct in a global context      [The Invention of International Relations Theory](#) Nicolas Guilhot, 2011-01-05 The 1954 Conference on Theory sponsored by the Rockefeller Foundation featured a who's who of scholars and practitioners debating the foundations of international relations theory Assembling his own team of experts all of whom have struggled with this legacy Nicolas Guilhot revisits a seminal event and its odd rejection of scientific rationalism Far from being a spontaneous development these essays argue the emergence of a realist approach to international politics later codified at

the conference was deliberately triggered by the Rockefeller Foundation. The organization was an early advocate of scholars who opposed the idea of a science of politics pursuing for the sake of disciplinary autonomy a vision of politics as a prerational and existential dimension that could not be solved by scientific means. As a result, this nascent theory was more a rejection of behavioral social science than the birth of one of its specialized branches. The archived conversations reproduced here along with unpublished papers by Hans Morgenthau, Reinhold Niebuhr, and Paul Nitze speak to this defensive stance. International relations theory is critically linked to the context of postwar liberalism, and the contributors explore how these origins have played out in political thought and American foreign policy.

International Relations Theory for the Twenty-First Century Martin Griffiths, 2007-10-24 International relations theory has been the site of intense debate in recent years. A decade ago it was still possible to divide the field between three main perspectives: Realism, Liberalism, and Marxism. Not only have these approaches evolved in new directions, they have been joined by a number of new isms vying for attention, including feminism and constructivism. International Relations Theory for the Twenty-First Century is the first comprehensive textbook to provide an overview of all the most important theories within international relations. Written by an international team of experts in the field, the book covers both traditional approaches such as realism and liberal internationalism, as well as new developments such as constructivism, poststructuralism, and postcolonialism. The book's comprehensive coverage of IR theory makes it the ideal textbook for teachers and students who want an up-to-date survey of the rich variety of theoretical work, and for readers with no prior exposure to the subject.

**Political Realism in**

**International Theory** Roger D. Spegele, 1996-08-22 In this 1996 book Roger Spegele argues that in the past international theorists have failed to recognise that there is not one conception of international relations subdivided into different theories and approaches but at least three wholly different conceptions of the subject Though scholars are increasingly prepared to accept this there is still no consensus about what to call these conceptions how to describe them and why they should be studied This book attempts to fill this gap The author first examines two conceptions of IR positivism empiricism and emancipatory international relations which challenge political realism He then defends a revised version of realism called evaluative political realism from challenges arising from its rivals with the aim of defining a conception of political realism which is coherent viable and attractive Political Science: Theory, Institutions, and Global Dynamics Dr. M.N.
