Griffiths,1959 **Educational Administration: Theory, Research, and Practice** Wayne K Hoy,Cecil G Miskel,2012-03-22 One of the most widely read books in educational leadership Educational Administration uses a systems perspective to synthesize the relevant theory and research on organizational behavior and focuses on understanding and applying theory to solve problems of practice With each new edition the latest research and theory are incorporated into the analysis of teaching learning and leading Educational Administration helps future administrators understand the content and context of schools remember key ideas and principles and apply and practice those principles as they lead *Educational Administration* Wayne Hoy,2007 **Educational Administration** Wayne K. materials including issues for discussion Key terms are defined in text for the non expert reader and all references and relevant key legislation details have been fully updated This book is essential reading for all teachers who aspire to management as well as for experienced leaders on Masters level courses and for those studying school management as part of education studies degrees

The Knowledge Base in Educational Administration Robert Donmoyer,Michael Imber,James Joseph Scheurich,1995-07-01 For scholars and practitioners who are interested in or are concerned about knowledge based issues this book provides a needed antidote to narrow discussions of foundational issues The editors of this book maintain that discussions of a knowledge base in educational administration have typically been limited to a fairly traditional range of scholarly commentary reflective of the status quo within departments of educational administration over the past several decades Other views such as feminist views race ethnic based orientations those that dispute the very idea of a knowledge base and those that simply expand the traditional range have been given little attention within the knowledge base discourse The purpose of this book is thus to open up this discourse by broadening the range of viewpoints being considered
