Third IEEE Workshop on Mobile Computing Systems and Applications IEEE Computer Society. Technical Committee on the Internet, 2000 Annotation Seventeen papers from the December 2000 workshop discuss ubiquitous and context aware computing service discovery and interaction personal mobility systems support and UI toolkits for mobile devices and protocols for wireless networks Some of the topics are a virtual machine architecture designed for mobile embedded systems the Roma personal metadata service performance evaluation of a lightweight resource reservation protocol for mobile Internet hosts optimizing thin clients for wireless active media applications and using CORBA applications in nomadic environments No subject index Annotation copyrighted by Book News Inc Portland OR

Tools to Aid State DOTs in Responding to Workforce Challenges, 2009 This report is a guide to the selection of practical tools that officials of state departments of transportation DOTs can use in recruitment development and retention of a productive and effective workforce Foreword [The Railway and Marine World](#), 1912

Office Automation Charles M. Ray, Amy D. Wohl, 1995

The Future of Automated Freight Transport J. W. Konings, Hugo Priemus, Peter Nijkamp, 2005 This book explores the many challenges faced by the development and implementation of automated freight transport systems It offers a unique overview of current applications developments and future perspectives The subject of automation is not covered extensively in the existing literature on freight transport and this book aims to fill the gap In view of the increasing difficulties in coping with growing transport volumes in an efficient and sustainable way the development of new automated freight applications could be a viable alternative The first chapters of the book are devoted to an overview of concepts and current research developments in automated transport outlining the opportunities barriers and threats for further development paths for different transport modes The authors then go on to focus on innovative tools to design and evaluate these new transport developments The book closes with a detailed and critical analysis of what is probably the most critical part of system innovation that is the implementation of automated systems Written from a multi disciplinary perspective which reflects the diversity of the relevant issues needing consideration when designing developing and implementing such systems this book will be an invaluable source for scholars and researchers of innovation and transport studies In addition the book will be useful to policymakers and practitioners involved in the design development and implementation of new technologies for freight transport It may also appeal to wider readers with an interest in the future of freight transport systems
