

The book cover features a vibrant, abstract background. At the top, a large, detailed eye with a purple iris and a white pupil is visible. Below the eye, a dark silhouette of a figure stands on a landscape of layered, reddish-brown and purple rock formations. Understanding Origins:

Understanding Origins Francisco J. Varela, J.P. Dupuy, 2013-03-09 The main intention of this book is to bring together contributions from biology cognitive science and the humanities for a joint exploration of some of the main contemporary notions dealing with the understanding of origins in life mind and society The question of origin is inseparable from a web of hypotheses that both shape and explain us Although origin invites examination it always seems to elude our grasp Notions have always been produced to interpret the genesis of life mind and the social order and these notions have all remained unstable in the face of theoretical and empirical challenges In any given period the central ideas on origin have had a mutual resonance frequently overlooked by specialists engaged in their own particular fields As a consequence this book should be of interest to a wide audience In particular for all those engaged in the social sciences and the philosophy of science it is a unique document since bridges to the natural sciences in a mutually illuminating way are hard to find Whether as a primary source or as inspirational reading we feel this book has a place in every library The material comes from an international meeting held in September 13-16 1987 at Stanford University organized by F Varela and J P Dupuy at the request of the Program of Interdisciplinary Research of Stanford University We are grateful to Rene Girard the Program Director for making it possible with the help of the Mellon Foundation

Understanding History Teaching Chris Husbands, Alison Kitson, Anna Pendry, 2003-09-16 Understanding History Teaching is an enjoyable read with a logical and flowing structure It lives up to its goal of appealing to both academic and professional readers with both academic depth and real insights and opportunities for the professional teacher to draw from It presents its data and interpretations in a manner which does not avoid the issues revealed within the research but has an uplifting effect on the reader and leaves them feeling optimistic about the quality of History teaching in UK secondary schools Robert Wyness Student De Montfort University Leicester UK Why do we teach and learn about the past How is history taught in schools What are the influences on the way teachers teach and pupils learn about the past History is one of the most ideologically disputed of school subjects Over the past generation the subject has experienced fundamental changes in content pedagogy and approach This book is the first detailed account of the way history is taught in schools to be published for 30 years Drawing on fieldwork in comprehensive schools and on research studies worldwide the authors pose fundamental questions about the way teachers teach and learners learn They consider its purposes on teaching about the past in a world of accelerating change The book sets out to explore the realities of classroom history teaching and to offer pointers for the development on the subject in a new century
