Cognitive Diagnostic Assessment for Learning Peida Zhan, Feiming Li, Hong Jiao, 2022-01-19

The Psychology of Thinking John Paul Minda, 2015-09-26 How do we define thinking Is it simply memory perception and motor activity or perhaps something more complex such as reasoning and decision making This book argues that thinking is an intricate mix of all these things and a very specific coordination of cognitive resources Divided into three key sections there are chapters on the organization of human thought general reasoning and thinking and behavioural outcomes of thinking These three overarching themes provide a broad theoretical framework with which to explore wider issues in cognition and cognitive psychology and there are chapters on motivation and language plus a strong focus on problem solving reasoning and decision making all of which are central to a solid understanding of this field The book also explores the cognitive processes behind perception and memory how we might differentiate expertise from skilled competent performance and the interaction between language culture and thought

Illusion of Control: The Superstitious Mind at Work Sophia J. Heasley, 2026-03-16 Have you ever pressed a crosswalk button multiple times convinced it would make the light change faster Or perhaps you roll the dice a little harder when you need a high number in a board game These tiny irrational actions are symptoms of a profound psychological necessity the absolute refusal to accept that we are at the mercy of chance The Illusion of Control is the cognitive bias that makes us believe we can influence outcomes that are demonstrably random It is the invisible architect behind the multi billion dollar gambling industry the bizarre rituals of professional athletes and the disastrous miscalculations of Wall Street traders Our brains are pattern seeking machines terrified of chaos and desperate for agency This book dismantles the comforting lies we tell ourselves about probability We will explore the dark side of this illusion showing how the belief in our own influence can trap us in toxic investments superstitious compulsions and fatal errors in risk assessment Reclaim your rationality from the grip of superstition By recognizing the Illusion of Control you can stop fighting mathematical randomness accept the limits of your agency and make truly calculated decisions in an unpredictable reality

The Outcome Trap Elena Sharp, 2026-01-27 The Outcome Trap Why success is a terrible teacher of strategy attacks the fundamental flaw in how we evaluate leadership and choices Outcome Bias We tend to judge a decision based solely on its result If a CEO takes a reckless gamble and wins he is a genius If he loses he is a fool This book argues that the quality of a decision is independent of its outcome Strategist Elena Sharp explains that in a probabilistic world you can make a terrible decision and get lucky dumb luck or a perfect decision and lose bad beat Focusing only on results prevents learning because it reinforces bad habits that were rewarded by chance The Outcome Trap teaches readers to result proof their analysis It offers a framework for auditing the decision making process itself ensuring that you are betting with the odds not just celebrating a lucky roll of the dice
