Understanding how Family-level Dynamics Affect Children's Development : Studies of Two-parent Families

James P. McHale, Philip A. Cowan, 1996 **Understanding How Family-Level Dynamics Affect Children's Development**

James P. McHale, Philip A. Cowan, 1997-10-03 Recent studies of early socialization and child development have begun to contextualize early family influences more broadly than ever before. Yet despite advances in family and child research over the past decade, most studies continue to examine dyadic subsystems of the larger family system rather than the full family context. With a few noteworthy exceptions, empirical support for the utility of whole family analysis in child development research remains to be established. This sourcebook draws together diverse studies of whole family dynamics to explore the potential of this paradigm for understanding individual variability in children's early social and emotional development. Several chapters underscore the significance of coparental processes: behaviors between adults that include and involve the child. Other chapters assess patterns of cohesion, emotion coordination, and involvement among members of the family group. Though the studies reported in this sourcebook capture family level processes in only one type of family, the two-parent family, they provide a knowledge base from which subsequent research on other family configurations can proceed. It is our hope that this sourcebook moves us one step closer to realizing the rich and nuanced perspectives inherent in the careful clinical observations and writings of family therapists who emphasize the relevance of the whole family group for our safety, health, security, and reality. This is the 74th issue of the quarterly journal *New Directions for Child Development*.

Interparental Conflict and Child Development John H. Grych, Frank D. Fincham, 2001-03-19 *Interparental Conflict and Child Development* provides an in-depth analysis of the rapidly expanding body of research on the impact of interparental conflict on children. Emphasizing developmental and family systems perspectives, it investigates a range of important issues, including the processes by which exposure to conflict may lead to child maladjustment, the role of gender and ethnicity in understanding the effects of conflict, the influence of conflict on parent-child, sibling, and peer relations, family violence, and interparental conflict in divorced and step families. **The Oxford Handbook of Infant, Toddler, and**

Preschool Mental Health Assessment Rebecca DelCarmen-Wiggins, Alice S. Carter, 2019-12-02 This fully updated new edition of *The Oxford Handbook of Infant, Toddler, and Preschool Mental Health Assessment* remains the leading reference for those seeking to understand and assess mental health in infants and young children. Detailing the latest empirical research on measures and methods of infant and young child assessment and providing clinically applicable information for practitioners, this handbook takes a closer look at current developmentally based conceptualizations of mental health function and dysfunction in infants and young children, as well as current and new diagnostic criteria in specific disorders such as sensory modulation dysfunction, autism spectrum disorders, affective disorders, and post-traumatic stress disorder. Presented in four sections, chapters correspond to four broad themes: contextual factors in early assessment, temperament, and

regulation in assessment of young children early problems and disorders and translation and varied applied settings for assessment Each chapter presents state of the science information on valid developmentally based clinical assessment and makes recommendations based on developmental theory empirical findings and clinical experience Chapters have been added to this second edition covering family assessment early care and educational environments new approaches for distinguishing temperament from psychopathology assessing language and implementing second stage screening and referral The volume recognizes and highlights the important role of developmental social and cultural contexts in approaching the challenge of assessing early problems and disorders This new updated volume will be an ideal resource for teachers researchers and a wide variety of clinicians and trainees including child psychologists and psychiatrists early interventionists and early special educators

Handbook of Parenting: Being and becoming a parent Marc H. Bornstein,2002 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny

Handbook of Infant Mental Health Charles H. Zeanah, Jr.,2012-03-01 Widely regarded as the standard reference in the field this state of the art handbook offers a comprehensive analysis of developmental clinical and social aspects of mental health from birth to the preschool years Leading authorities explore models of development biological family and sociocultural risk and protective factors and frequently encountered disorders and disabilities Evidence based approaches to assessment and treatment are presented with an emphasis on ways to support strong parent child relationships The volume reviews the well documented benefits of early intervention and prevention and describes applications in mental health primary care childcare and child welfare settings The chapter on psychopharmacology has been updated for the paperback edition

Osofsky, World Association for Infant Mental Health, 2000 Keynote This 4 volume set offers comprehensive coverage of children s psychological development during the critical early years of life Infancy which is defined as the period from birth to 18 months of age is the single most critical stage in cognitive and socioemotional development The comprehensive WAIMH Handbook of Infant Mental Health offers the first thorough interdisciplinary analysis of the biopsychosocial factors that impact normal and abnormal infant mental development Assembled under the auspices of the leading international organization in infant development the World Association of Infant Mental Health this ground breaking four volume reference offers a state of the art overview of the field by the world s leading researchers clinicians and scholars **Conventionality in Cognitive Development: How Children Acquire Shared Representations in Language, Thought, and Action** Mark A. Sabbagh, 2007-03-30 An important part of

cognitive development is coming to think in culturally normative ways Children learn the right names for objects proper functions for tools appropriate ways to categorize and the rules for games In each of these cases what makes a given practice normative is not naturally given There is not necessarily any objectively better or worse way to do any of these things Instead what makes them correct is that people agree on how they should be done and each of these practices therefore has an important conventional basis The chapters in this volume highlight the fact that successful participation in practices of language cognition and play depends on children s ability to acquire representations that other members of their social worlds share Each of these domains poses problems of identifying normative standards and achieving coordination across agents This volume brings together scholars from diverse areas in cognitive development to consider the psychological mechanisms supporting the use and acquisition of conventional knowledge This is the 115th volume of the quarterly report series *New Directions for Child and Adolescent Development* [Conflict as a Context for Understanding Maternal Beliefs About Child Rearing and Children's Misbehavior](#) Caroline C. Piotrowski,Paul D. Hastings,1999 Complaints disputes disagreements arguments whatever terminology is applied conflicts between parents and their children are a ubiquitous feature of daily family life These conflicts play a pivotal role in both individual development and the maintenance of family relationships In this issue of *New Directions for Child and Adolescent Development* the authors examine mothers thoughts about during and in response to conflict and reveal how those maternal beliefs impact children s development Chapters shed light on mothers responses to and thoughts about sibling aggression the role of cultural climate in mothers use of physical punishment how mothers parenting goals and causal attributions vary across child gender and type of transgression and the relation between maternal beliefs and preschoolers behaviors with peers This is the 86th issue of the quarterly journal *New Directions for Child and Adolescent Development* [Current Index to Journals in Education](#) ,2000 [New Horizons in Developmental Theory and Research](#) Lene Arnett Jensen,Reed W. Larson,2005-10-04 This inaugural issue by the new editors in chief brings together a group of cutting edge developmental scholars who each report on promising new lines of theory and research within their specialty areas Their essays cover a selection of important topics including emotion regulation family socialization friendship self civic engagement media and culture In the succinct engaging essays all authors provide thought provoking views of the horizons in the field This is the 109th volume of the Jossey Bass quarterly report series *New Directions for Child and Adolescent Development* [The Nature and Functions of Gesture in Children's Communication](#) Jana M. Iverson,Susan Goldin-Meadow,1998-03-24 Imagine a child explaining a conservation judgment by saying That one s wider while indicating the height of a glass with his hand Now consider an adult saying She chased him while brandishing an imaginary umbrella in her hands In both of these examples information different from that conveyed by speech is communicated by movements of the hands These movements of the hands that co occur with speech gestures are the subject of this volume of the *New Directions for Child Development* series Although gesture has always been considered relevant to

talk it has usually been seen as a stream separate from speech one that can reflect the attitudes and feelings of speakers but that is not centrally involved in language It was not until recently that gesture became a legitimate interest of language researches The chapters herein focus on the spontaneous gestures that accompany speech especially the speech of children Together they confirm that gesture is a robust and integral part of communication that can provide unique insights into the mind This is the 79th issue of the quarterly journal New Directions for Child Development For more information on the series please see the Journals and Periodicals section
