Guston, 2010 Because of their far reaching consequences truly transformative technologies always generate controversy This encyclopedia covers the ethical legal policy social economic and business issues raised by nanoscience **The Hermeneutic Side of Responsible Research and Innovation** Armin Grunwald, 2016-12-27 The book investigates the meaning of RRI if little or no valid knowledge about consequences of innovation and technology is available It proposes a hermeneutical turn to investigate narratives about possible futures with respect to their contemporary meaning instead of regarding them as anticipations of the future **Public Understanding of Science**, 2009 A forum for the emerging interdisciplinary field of public understanding of science this journal encourages open debate of contrasting and even conflicting viewpoints on all aspects of the interrelationships between science and the public *Nanoculture* N. Katherine Hayles, 2004 Nano denotes a billionth a nanometer is a billionth of a meter New instrumentation and techniques have for the first time made possible materials research and engineering at this level the scale of individual molecules and atoms Extraordinary visions of material abundance unprecedented materials and powerful engineering capabilities have marked the arrival of nanotechnology as well as dystopian scenarios of self replicating devices running amok and causing global catastrophe Largely a future possibility rather than present actuality nanotechnology has become a potent cultural signifier NanoCulture explores the ways in which nanotechnology interacts with and itself becomes a cultural construction Topics include the co construction of nanoscience and science fiction the influence of risk assessment

and nanotechnology on the shapes of narratives intersections between nanoscience as a writing practice and experimental literature at the limits of fabrication the Alice in Wonderland metaphor for nanotechnology and the effects of mediation on nanotechnology and electronic literature NanoCulture is produced in collaboration with the nano art exhibit at the Los Angeles County Museum of Art December 2003 September 2004 created by an interdisciplinary team led by media artist Victoria Vesna and nanoscientist James Gimzewski NanoCulture is richly illustrated with images from the nano exhibit which also provides the basis for an ethnographic analysis of collaborative process and an exploration of changing concepts of museum space The dynamic uniting these diverse perspectives is boundary crossing between art science and literature cultural imaginaries scientific facts and technological possibilities actual virtual and hybrid spaces the science of fictions and the fictions of science and utopian dreams material constraints and dystopian nightmares The first book length study focus on cultural implications of nanotechnology NanoCulture breaks new ground in showing the importance of the new technoscience to contemporary culture and of culture to the development interpretation and future of this technoscience
