AI: THE WAY OF THE FUTURE

Way The Future Was

John Thomas McNeill

Way The Future Was:

The Way the Future Was Pierre Comtois,2008-10-01 Once upon a time the year 2000 had held a fascination for young people of the 1950s and 60s as the point beyond which the future predicted by decades of science fiction writers would arrive Unfortunately that future never happened and what we ended up with has been the somewhat disappointing present It is in keeping with those dreams that the stories in this collection were written hopefully to recapture the spirit of optimism young people had for the future at a time when World War II was not that far removed from living memory and American heroes were square jawed soldiers or God fearing scientists who were as comfortable in the cockpit of a jet as they were in a laboratory

The quality of monumentality is attributed to the buildings of few historical epochs or cultures more frequently or consistently than to those of the Roman Empire It is this quality that has helped to make them enduring models for builders of later periods This extensively illustrated book the first full length study of the concept of monumentality in Classical Antiquity asks what it is that the notion encompasses and how significant it was for the Romans themselves in moulding their individual or collective aspirations and identities Although no single word existed in antiquity for the qualities that modern authors regard as making up that term its Latin derivation from monumentum a monument attests plainly to the presence of the concept in the mentalities of ancient Romans and the development of that notion through the Roman era laid the foundation for the classical ideal of monumentality which reached a height in early modern Europe This book is also the first full length study of architecture in the Antonine Age when it is generally agreed the Roman Empire was at its height By exploring the public architecture of Roman Italy and both Western and Eastern provinces of the Roman Empire from the point of view of the benefactors who funded such buildings the architects who designed them and the public who used and experienced them Edmund Thomas analyses the reasons why Roman builders sought to construct monumental buildings and uncovers the close link between architectural monumentality and the identity and ideology of the Roman Empire itself
