Bogart, 2011 This text analyzes the effectiveness of law in controlling excessive consumption It engages theoretical discussions concerning the effectiveness of legal intervention especially regarding normativity the relationship between law and norms **The Technical World** ,1904 *InfoWorld* ,1991-11-11 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *Future Survey Annual 1985* Michael Marien, 1987-01-01 **Technology Policy** Georg Aichholzer, Gerd Schienstock, 1994 No detailed description available for Technology Policy **Technology and Information Services** Carol L. Anderson, Robert Hauptman, 1993 This handbook provides helpful guidance for the information services practitioner and manager It contains a wealth of concrete information necessary for managing technology and its applications and for providing technological leadership Although there are a plethora of monographs allocated to general and specific aspects of automation computerization and technological innovation in libraries and information centers this volume is unique in offering a conceptual framework for implementing and managing technologies plus a detailed discussion of technologies in relation to both the needs of information seekers and the changes they have wrought in delivering services to users The volume will also be of interest to students because it provides a historical context for recent changes brought about by technological applications describes current practices and explores issues and trends on the horizon **International Journal of Technology Management** ,1986 **Technology Assessment in a Dynamic Environment** Marvin J. Cetron, Bodo Bartocha, 1973 **Beyond the Technology Race** Annemieke J. M. Roobeek, 1990 During the 1980s governments in all industrial countries have tightened their grip on technological development This book illustrates the technology race between seven industrial countries in the

field of information technology biotechnology and new materials However the analysis of a government s role in technological development goes beyond the simple comparison of financial efforts and policy measures The policies of seven countries are analysed in their specific national context and much attention is paid to the differences in industrial structure the different social and institutional settings and national traditions in government intervention In order to gain insight into the diffusion of new technologies and the shifts in international competitive relations it is necessary to focus on the social base for technological change among the industrial countries In this context there is fundamental work to do for economists political scientists sociologists policy makers technical engineers consultants managers in strategic planning and human resources and so on
