young child Robert M Atlas would often look up at the sky observe the clouds and ask his parents questions about the  
weather That early interest sparked a career in meteorology that took place during a period of rapid development in the field  
Weather Forecaster to Research Scientist follows his decades long career and his innovative research which led to  
improvements in the understanding and prediction of extreme weather Atlas s journey begins with his start as an apprentice  
forecaster for the US Weather Bureau during a time when satellite meteorology and operational numerical weather  
prediction were just in their infancy Weather Forecaster to Research Scientist also traces his experiences as an operational  
forecaster in the US Air Force discusses his pioneering work on ocean surface winds using satellites and describes his  
leadership of scientific organizations within NASA and NOAA as well as his experiences teaching at several universities An

study of research on the psychology of expertise in weather forecasting drawing on findings in cognitive science meteorology  
and computer science This book argues that the human cognition system is the least understood yet probably most important  
component of forecasting accuracy Minding the Weather investigates how people acquire massive and highly organized  
knowledge and develop the reasoning skills and strategies that enable them to achieve the highest levels of performance The  
authors consider such topics as the forecasting workplace atmospheric scientists descriptions of their reasoning strategies  
the nature of expertise forecaster knowledge perceptual skills and reasoning and expert systems designed to imitate  
forecaster reasoning Drawing on research in cognitive science meteorology and computer science the authors argue that  
forecasting involves an interdependence of humans and technologies Human expertise will always be necessary *Monthly*
