Web Sites Cynthia Waddell, Bob Regan, Shawn Lawton Henry, Michael R. Burks, Jim Thatcher, Mark D. Urban, Paul Bohman, 2003-07-14 Accessibility is about making websites that don't exclude people with visual, aural or physical disabilities. Through real world examples this practical book will teach you how to create or retrofit accessible websites quickly and easily. This book is aimed toward web professionals creating accessible websites or updating existing sites to make them accessible. It's also useful for corporate, university and government policy makers involved in the development and maintenance of websites for their institutions. The thorough and practical accessibility techniques outlined in this book come from some of the best accessibility professionals in the business. The techniques are illustrated and accompanied by real world examples from live sites demonstrating that accessibility is not the enemy of great visual design. **Understanding Creative Users of ICTs** David Kurt Herold, Harmeet Sawhney, Leopoldina Fortunati, 2013-09-13 The disjuncture between the design intent of the developers of ICTs and the needs of the users has often led to surprising use of new technologies as users have refused to become mere agents of the designers. Individual users have adopted their own uses of ICTs based on the complex webs of relations and meanings in which they function as social actors. Instead of adjusting these webs to new ICTs they have fit the ICTs into their pre-existing social webs often resulting in imaginative and creative uses of new technologies not envisaged by the original designers. The contributions in this volume provide studies of such integrations of ICTs into the lives of human users and demonstrate that such uses should not be regarded as faulty or mistaken merely because they fail to meet the expectations of the original designers of the ICTs. Instead human users should be given precedence over ICTs and the creative uses of universal technologies by individual users should be emphasised and studied so as to move towards a better understanding and appreciation of the integration of ICTs into human lives.
