Theorizing Video Practice:

Theorising Media and Practice Birgit Bräuchler, John Postill, 2010-11-01 Although practice theory has been a mainstay of social theory for nearly three decades so far it has had very limited impact on media studies This book draws on the work of practice theorists such as Wittgenstein Foucault Bourdieu Barth and Schatzki and rethinks the study of media from the perspective of practice theory Drawing on ethnographic case studies from places such as Zambia India Hong Kong the United States Britain Norway and Denmark the contributors address a number of important themes media as practice the interlinkage between media culture and practice the contextual study of media practices and new practices of digital production Collectively these chapters make a strong case for the importance of theorising the relationship between media and practice and thereby adding practice theory as a new strand to the study of anthropology of media *Theorising Video Practice* Mike Wayne, 1997 Wayne examines the contexts in which audio visual production takes place the language of visual production the relationship between production consumption and texts institutional and industrial structures and historical contexts

Theories of Learning and Studies of Instructional Practice Timothy Koschmann, 2011-04-19 This is a book about an attempt to change the way math was taught in a particular classroom Its title plays on our everyday usage of the terms theory and practice In education these terms are conventionally treated oppositionally we have theories about what we should do and we have what teachers actually do do In this way theory stands prior logically and chronologically to practice practice inevitably becoming theory's imperfect realization We seek in this volume however to develop a different stance with regard to the relationship between the two Taking the details of instructional practice as our principle object of study we explore what role theories of learning might play in illuminating such practices The book is about actual practices by which teaching is done and how contemporary theories of learning might help us understand those practices It seeks to provide a foundation for future practice based inquiry in education by addressing the methodological question How do we go about studying instructional practice in a principled way *Theorizing Visual Studies* James Elkins, 2013 This forward thinking collection brings together over sixty essays that invoke images to summon interpret and argue with visual studies and its neighboring fields such as art history media studies visual anthropology critical theory cultural studies and aesthetics The product of a multi year collaboration between graduate students from around the world spearheaded by James Elkins this one of a kind anthology is a truly international interdisciplinary point of entry into cutting edge visual studies research The book is fluid in relation to disciplines it is frequently inventive in relation to guiding theories it is unpredictable in its allegiance and interest in the past of the discipline reflecting the ongoing growth of visual studies
