*Berkeley's Revolution in Vision* Margaret Atherton, 2019-05-15 Berkeley s Essay towards a New Theory of Vision 1709 his first substantial publication revolutionized the theory of vision His approach provided the framework for subsequent work in the psychology of vision and remains influential to this day Among philosophers however the New Theory has not always been read as a landmark in the history of scientific thought but instead as a halfway house to Berkeley s later metaphysics In this book Margaret Atherton seeks to redress the balance through a commentary on and a reinterpretation of Berkeley s New Theory

**Berkeley's Doctrine of Signs** Manuel Fasko, Peter West, 2024-04-22 This volume focuses on Berkeley s doctrine of signs The doctrine of signs refers to the use that Berkeley makes of a phenomenon that is central to a great deal of everyday discourse one whereby certain perceivable entities are made to stand in for as signs of something else Things signified might be other perceivable entities or they might also be unperceivable notions such as the meanings of words From his earliest published work A New Theory of Vision in 1710 to those works written towards the end of life including Alciphron in 1732 Berkeley is at pains to emphasise the crucial role that sign usage particularly but not only in language plays in human life Berkeley also connects sign usage to our human relationship with God an issue that was right of the heart of his philosophical project The contributions in this volume explore the myriad ways that Berkeley built on such insights to better understand a range of philosophical issues issues of epistemology language perception mental representation mathematics science and theology The aim of this volume is to establish that the doctrine of signs can be seen as one of the unifying themes of Berkeley s philosophy What s more this theme is one which spans his whole philosophical corpus not just his best known works like the Principles and the Three
