Understanding Offending Behaviour:

Psychology and Crime Francis Pakes, Jane Winstone, 2013-05-13 Society today is fascinated by crime. Crime is a hot topic in the media so that people are continually exposed to criminal events, portrayals of those who commit them and the suffering of victims. Yet the reality of crime is often very different from how it is portrayed in the media. Most crime is neither violent nor morbid; most offenders are not psychopaths and although prison generally does not work, there may well be other, less punitive but more constructive interventions that are actually quite effective. This book exposes some of the most prevalent myths about crime and criminal behaviour. In addition, it provides the reader with up-to-date knowledge on crime and offending behaviour. It also highlights the ways in which psychological methods of research and psychological knowledge can help us to understand criminal behaviour and the ways that targeted interventions are developed based upon this. Pakes and Winstone's *Psychology and Crime* is essential reading for students taking courses in the psychology of crime, criminal and forensic psychology, criminology and community justice, as well as for other courses where a knowledge of the complex relationship between psychology and crime and its application in practice is required. Practitioners and policy makers will also find it highly informative.

Understanding Offending Behaviour John Stewart, 2017-09-29 Based on a survey of probation work with almost 1400 young adult offenders, this book provides a unique insight into the realities of probation practice in a context of increasing poverty, drug use and community breakdown. Starting with an outline of the current policy environment, the book discusses the relevance of criminological theory to the harsh experience of young offenders in modern Britain. It goes on to develop a typology of offending behaviour on the basis of detailed and often disturbing accounts of the histories and troubles of young people afflicted by poverty, disruption of family relationships and long-term unemployment. While much of the book is concerned with the difficulties young offenders experience and the problems probation officers have in trying to help them change, the overall message of the book is not one of despair. The authors show that good probation practice can make a difference and the book is written in a way which will be useful to practitioners and policy makers involved with supervising offenders in the community. From the typology of offending, the authors extract lessons for appropriate and relevant practice which should help to improve the quality and effectiveness of the probation service. Some of these implications are explored in the concluding chapter by Cedric Fullwood, Chief Probation Officer of Greater Manchester. As well as criminal justice practitioners, students of criminology, probation trainees and other social work students will find in the book many vivid examples of how sociological theory can be used to understand and interpret practice. The book is likely to provoke much debate about what constitutes positive practice in a probation service facing the challenges of the future.
