Nadeau, 2017-10-14 Excerpt from *The Water Seekers* Until the rise of modern cities these Roman aqueducts were unrivaled In the early 1600s the spreading metropolis of London turned afield for more water building a twenty mile conduit from two great springs in Hertfordshire The United States saw its first big water quest when the rising city of New York bursting with a population of launched its forty mile aqueduct to the Croton watershed in 1832 On its completion ten years later most New Yorkers agreed with the earlier prophecy of De Witt Clinton It is not at all probable that the city will ever require more than it can provide But New York proceeded to ignore his words and perplex her water engineers with an astonishing growth Her population had passed when drought struck in 1880 The city was separated from thirst by a ten day water supply in the reservoirs when timely rains forestalled disaster Having experienced water famine New York lost little time in reaching out for a new supply A second aqueduct tapping the full limit of the Croton watershed was finished barely in time to save the city from another desperate drought in 1891 The Big Town's resolute expansion sent water engineers farther afield by the early 1900s A hundred miles north of New York lay an enormous new source in the wooded and sparsely settled Catskill Mountains in the ten years from 1907 to 1917 the city built a third great aqueduct over the route more than doubling its Croton supply While construction was in progress another drought visited New York in 1911 forcing house to house checkups on leaky faucets Only by careful water conservation did its citizens hold off water famine until the completion of their Catskill Aqueduct which served a population of more than Outpacing all other American cities in size New York was also pointing the way in the business of seeking water About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **The Water Seekers** ,2017

**The Mirage Factory** Gary Krist, 2019-05-14 From bestselling author Gary Krist the story of the metropolis that never should have been and the visionaries who dreamed it into reality Little more than a century ago the southern coast of California bone dry harbor less isolated by deserts and mountain ranges seemed destined to remain scrappy farmland Then as if overnight one of the world's iconic cities emerged At the heart of Los Angeles meteoric rise were three flawed visionaries William Mulholland an immigrant ditch digger turned self taught engineer designed the massive aqueduct that would make urban life here possible D W Griffith who transformed the motion picture from a vaudeville house novelty into a cornerstone of American culture gave L A its signature industry And Aimee Semple McPherson a charismatic evangelist who

founded a religion cemented the city's identity as a center for spiritual exploration. All were masters of their craft but also illusionists of a kind. The images they conjured up of a blossoming city in the desert of a factory of celluloid dreamworks of a community of seekers finding personal salvation under the California sun were like mirages liable to evaporate on closer inspection. All three would pay a steep price to realize these dreams in a crescendo of hubris, scandal, and catastrophic failure of design that threatened to topple each of their personal empires. Yet when the dust settled, the mirage that was LA remained. Spanning the years from 1900 to 1930, *The Mirage Factory* is the enthralling tale of an improbable city and the people who willed it into existence by pushing the limits of human engineering and imagination.
