practice For a long period the field of this scientific agriculture was almost wholly that of production Special students of agriculture were endeavoring to discover the laws of plant and animal growth and the interrelations of soil climate and plant More recently efforts are being made to work out in the same fashion the laws of economic and social development Thus the field of scientific agriculture has broadened to include all the interests of farmers and their communities A remarkable development of this broadened field of agriculture has been the recent extension of agricultural education Teachers in the agricultural colleges at first gave their efforts largely to the teaching of resident students Then gradually the professors began to go out to talk to the farmers After a while came the Farmers Institutes where working farmers and agricultural specialists joined forces in a program of instruction and discussion The Act of Congress known as the Smith Lever Act passed in 1914 opened on a national basis a wonderful chapter in agricultural extension service and the County Agent became the clearing house of information and suggestion between the working farmer and the educational institutions About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
