

WHAT IS HUMANISM?

Humanism is a Renaissance cultural movement which turned away from medieval scholasticism and revived interest in ancient Greek and Roman thought.

Humanism is an approach to life based on reason and our common humanity, recognizing that moral values are properly founded on human nature and experience alone.

Humanists reject the idea or belief in a supernatural being such as God. This means that humanists class themselves as agnostic or atheist.

culture that seemed to have lost its way The group called themselves the Moot Drawing on previously unpublished archival documents this is the first in depth study of the group s work writings and ideas in the decade of its existence from 1938 1947 Christian Modernism in an Age of Totalitarianism explores the ways in which an important and influential strand of Modernist thought in the interwar years turned back to Christian ideas to offer a blueprint for the revitalisation of European culture In this way the book challenges conceptions of Modernism as a secular movement and sheds new light on the culture of the late Modernist period *The Analysis of Virtue in Alasdair MacIntyre and His View of "The Enlightenment Project"* Benjamin Okon MSP,2016-04-15 MacIntyre is greatly discontented with the nature of contemporary morality which according to him has a form i e what appears like morality but lacks essential content He argues that the most common feature of contemporary ethical discourse is that much of it is used to express individual preferences which leads to disagreements among philosophers and eventually results in debates that are interminable in character MacIntyre attributes the cause of this situation to the activities of the enlightenment philosophers of the 17th and 18th centuries who in an attempt to find rational justification for morality repudiated those essential elements that define the essence of morality and give it its contents Such elements include historical narrative tradition teleology and divine law In MacIntyres opinion morality so constructed was destined for failure since it was not founded on the true nature of the human person The obvious consequences of this failure were the birth of diverse post enlightenment ethical theories and a substantial change in the conception of virtue In order to remedy this deplorable condition of contemporary ethics MacIntyre along with other virtue ethicists advocates a certain renaissance of ethical principles that are founded on the true nature of the human person characterized by historical narrative tradition and teleology all grounded on divine legislation Morality thus reconstructed finds its fullest expression in the theory of human character traits i e virtues This is what has motivated MacIntyres construction of virtue theory which has brought him into confrontation with the enlightenment philosophers Our study and analysis of MacIntyres theory of virtue reveals that his account of virtue is inadequate This inadequacy is what has motivated our own project of reconstructing MacIntyres theory of virtue in view of offering an account of virtue that is adequate In this way our own project complements that of MacIntyre **Living Existentialism** J. C. Berendzen, Gregory Hoskins, 2017-03-24 Writing in the late 1990s about the tendency of encyclopedists to designate existentialism a finished project Thomas W Busch cautions that such hasty periodization risks distorting our understanding of the contemporary philosophical scene and of depriving ourselves of vital resources for critiquing contemporary forms of oppression what Garbriel Marcel referred to as processes of dehumanization We should recall that existentialism made possible present forms of Continental philosophy all of which assume the existentialist critique of dualism essentialism and totality in modern philosophy and we should acknowledge that existentialism remains capable of haunting today s scene as an important and relevant critic Offered in honor of Thomas W Busch after his more than fifty years of work in philosophy the essays in this volume attest to

existentialism as a living project The essays are written by scholars who championed existentialism in America and by scholars who now seek to extend existentialist insights into new territory including into research in cognitive science The essays range from studies of key figures and texts to explorations of urgent topics such as the nature of freedom and the possibility of what Busch calls incorporation a sense of communicative solidarity that respects difference and disagreement
