The Unity of Truth Allen A. Sweet, Fritz Jaensch, C. Francis Sweet, 2012-09-13 Many of the seven billion people who live on the earth look to either science or religion as the ultimate source of authority in their lives But why must there be a conflict between the two Why cant science and religion support each other *The Unity of Truth* shows why and how it makes perfect sense for science and religion to be mutually supportive Beginning with the accepted truths of modern science and the beliefs of traditional Christianity authors Allen A Sweet C Frances Sweet and Fritz Jaensch use their diverse expertise to deliver a deeper level of understanding of the ways in which science and religion can coexist Relying on a thorough knowledge of physics theology and mathematics this study addresses the paradox of how God communicates with our material world without violating any of the laws of science Individual chapters discuss some of the most popular quandaries associated with combining science and religion In addition it considers the beginning and end of our universe the evolution of life and the meaning of human emotions from the scientific and theological perspectives thus pushing understanding to a higher plateau of wisdom Rational and devoid of rhetoric *The Unity of Truth* seeks to help resolve the ongoing battle between religion and

science delivering a thoughtful narrative designed to open minds and hearts *Current Trends in Philosophy of Science*

Inside Reality Dr. Thomas Stark, There are those such as scientists who see only the outside of reality its appearance its surface its phenomenal aspect They are blind to the inside the substance the foundation the noumenal aspect They dismiss it as non existent or illusion or epiphenomenon Scientists are those that believe that phenomena have no underlying noumena What you see is what you get Seeing is believing Everything is appearance Nothing is concealed There are no hidden variables and no unobservables The scientific method says Observe That works only if everything is observable If there are foundational unobservables science is catastrophically wrong and has cut itself off from the truth The only truth it can furnish is that of surfaces and appearances with no substance Those who truly want to understand reality must become masters of both perspectives inside and outside noumenon and phenomenon and see how they relate communicate and interact
