University Research in Transition ,1998 *Research and Development in University Mathematics Education* Viviane Durand-Guerrier,Reinhard Hochmuth,Elena Nardi,Carl Winsløw,2021-04-15 In the last thirty years or so the need to address the challenges of teaching and learning mathematics at university level has become increasingly appreciated by university mathematics teachers and beyond by educational institutions around the world Indeed mathematics is both a condition and an obstacle to success for students in many educational programmes vital to the 21st century knowledge society for example in pure and applied mathematics engineering natural sciences technology economics finance management and so on This breadth of impact of mathematics implies the urgency of developing research in university mathematics education and of sharing results of this research widely This book provides a bespoke opportunity for an international audience of researchers in didactics of mathematics mathematicians and any teacher or researcher with an interest in this area to be informed about state of the art developments and to heed future research agendas This book emerged from the activities of the research project INDRUM acronym for International Network for Didactic Research in University Mathematics which aims to

contribute to the development of research in didactics of mathematics at all levels of tertiary education with a particular concern for the development of early career researchers in the field and for dialogue with university mathematicians The aim of the book is to provide a deep synthesis of the research field as it appears through two INDRUM conferences organised in 2016 and 2018 It is an original contribution which highlights key research perspectives addresses seminal theoretical and methodological issues and reports substantial results concerning the teaching and learning of mathematics at university level including the teaching and learning of specific topics in advanced mathematics across a wide range of university programmes

Higher Education Transitions Eva Kyndt, Vincent Donche, Keith Trigwell, Sari Lindblom-Ylänne, 2017-05-18 In the current era where lifelong learning is brought to the fore higher education can no longer be regarded as an isolated trajectory within one's educational career as many students face substantial challenges in crafting their professional future More specifically the transition from school to higher education and continuing to the labour market are often a difficult hurdles for many students Almost half of students do not succeed in the first year and often withdraw from education students are faced with a variety of contexts and may choose to study in a different international context and they are then confronted with structural barriers in finding a high quality job as evidenced by increasing levels of youth unemployment and underemployment Higher Education Transitions aims to deepen our understanding of the transitions taking place when students enter progress and leave higher education to enter the labour market Drawing on an international team of contributors this guide includes three conceptual and fifteen empirical studies which include a range of quantitative qualitative cross sectional and longitudinal studies Divided into three sections to reflect each important transition phase topics include transitions from secondary to higher education transitions within higher education transitions from higher education to the labour market By considering transitions across different phases as a broad and interrelated process this guide will be essential reading for higher education researchers policy stakeholders and all those interested in the transitions into higher education and the labour market

The Bloomsbury Handbook of Early Childhood Transitions Research Aline-Wendy Dunlop, Sally Peters, Sharon Lynn Kagan, 2024-09-19 Research into early childhood transitions has become a field in its own right It is increasingly understood that a positive start in any new setting can influence the child's engagement sense of belonging well being progression in learning and agency and may be dependent on the insight of educators and families and yet there is no research methodology or research methods book dedicated to this growing field of study Including 27 chapters written by researchers from the UK New Zealand the USA Sweden Iceland Australia and Canada this handbook presents an overview of the field exploring its current debates reflects on its history and offers suggestions for the future of the field This book is an essential reference point for anyone studying or undertaking research into transitions in early childhood

Thriving in Transitions Denise D. Nelson, Laurie A. Schreiner, Michelle C. Louis, 2012-05-17 Thriving in Transitions A Research Based Approach to College Student Success represents a paradigm shift in the student success

literature Grounded in positive psychology the thriving concept reframes the student success conversation by focusing on the characteristics amenable to change and that promote high levels of academic interpersonal and intrapersonal performance in the college environment The authors contend that a focus on remediating student characteristics or merely encouraging specific behaviors is inadequate to promote success in college and beyond The collection presents six research studies describing the characteristics that predict thriving in different groups of college students including first year students transfer students high risk students students of color sophomores and seniors and offers recommendations for helping students thrive in college and life *University Responsibility for the Adjudication of Research Misconduct* Stefan

Franzen,2021-05-12 This book offers a scientific whistleblower's perspective on current implementation of federal research misconduct regulations It provides a narrative of general interest that relates current cases of research ethics to philosophical historical and sociological accounts of fraud in scientific research The evidence presented suggests that the problems of falsification and fabrication remain as great as ever but hidden because the current system puts universities in charge of investigations and permits them to use confidentiality regulations to hide the outcomes of investigations The book documents the significant conflict of interest that arises because federal regulation gives universities the responsibility to conduct investigations of their own faculty with severely limited oversight The book is intended for young research scientists or anyone who wishes to understand the challenges faced by scientists in the workplace today The central thread in the book is an exclusive account of an experienced research scientist who was the first to expose the facts that led to the longest running research misconduct investigation in the history of the National Science Foundation **Assessing NASA's**
