Worlds Writing Systems:

Writing Systems of the World Florian Coulmas, 1991-01-08 This book is an account of the writing systems of the world from earliest times to the present Its aim is to explore the complex ways in which writing systems relate to the language they depict Writing Coulmas contends is not only the guide or garment of spoken language but has a deep and lasting effect on the development of language itself His study takes in Egyptian hieroglyphics and the cuneiform system of the ancient Near East he describes Chinese writing discussing why an apparently cumbersome system has been used continuously for more than 3 000 years he ranges across the writing systems of western Asia and the Middle East the Indian families and the various alphabetic traditions which had its origins in the multifarious world of Semitic writing and came to full bloom in pre Classical Greece

The World's Writing Systems Peter T. The World Atlas of Language Structures Martin Haspelmath, 2005-07-21 The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world s languages 142 world maps and numerous regional maps all in colour display the geographical distribution of features of pronunciation and

grammar such as number of vowels tone systems gender plurals tense word order and body part terminology Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps to display bibliographical sources and to establish correlations between features The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages The Atlas will be especially valuable for linguistic typologists grammatical theorists historical and comparative linguists and for those studying a region such as Africa Southeast Asia North America Australia and Europe It will also interest anthropologists and geographers More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics No institution involved in language research can afford to be without it
