Weldability of Steels Robert Daniel Stout, William D'Orville Doty, 1978 **Guide to Weldability of Steels** American Welding Society, 1944 Theory of Weldability of Metals and Alloys Ivan Hrivňák, 1992 This book reviews the behaviour of metals and alloys during welding In the first part the heat flow in arc welding processes is discussed The weld thermal cycle is explained in terms of heat input and the geometry of weld and thicknesses to be welded The real welding cycle is described in terms of thermal and strain cycles The weld metal is characterized in terms of fusion stage absorption of gases and stage of metal crystallization and structural transformation The metallurgical background of cracking is described by a full set of crackability tests along with the evaluation of metals from the point of view of crackability Post welding heat treatment is reviewed and includes the relaxation of stresses induced by welding Guidelines are given for the selection of steels for welded structures Several chapters examine the weldability of particular steels including high strength steels stainless steels high alloyed steels cryogenic steels and other metals and alloys The theories are quantified in the form of calculations or computing programmes Readers will find sufficient data for software processing *Guide to Weldability of Steels ...* Welding Research Council (U.S.), 1943 **The Weldability of Steels**, 2006 This technical note gives recommendations for the control of HAZ hardness and avoidance of cold cracking in carbon carbon manganese and low alloy steels Cold cracking may also be known as Delayed cracking Hydrogen Induced Cracking or Hydrogen Assisted Cold Cracking This document provides guidelines on avoidance of cold cracking and on the weldability and pre heat requirements of constructional steels based on the following factors Reference 1 carbon equivalent of the steel and its related group number thickness and joint type of the weldment to be fabricated welding energy input provided by the welding process expected hydrogen content of the welding process page 2 *Weldability of Steel* K.
