Get Better at Anything Scott H. Young,2024-05-07 The author of the Wall Street Journal bestseller Ultralearning explores why it s so difficult for people to learn new skills arguing that three factors must be met to make advancement possible and offering 12 maxims to improve the way we learn Life revolves around learning in school at our jobs even in the things we do for fun Yet learning is often mysterious Sometimes it comes fairly effortlessly quickly finding our way around a new neighborhood or picking up the routine at a new job In other cases it s a slog We may spend hours in the library yet still not do well on an exam We may want to switch companies industries or even professions but not feel qualified to make the leap Decades spent driving a car typing on a computer or hitting a tennis ball

don't reliably make us much better at them Improvement can be fickle if it comes at all In *Get Better At Anything* Scott Young argues that there are three key factors in helping us learn See Most of what we know comes from other people The ease of learning from others determines to a large extent how quickly we can improve Do Mastery requires practice But not just any practice will do Our brains are fantastic effort saving machines which can be both a tremendous advantage and a curse Feedback Progress requires constant adjustment Not just the red stroke of a teacher's pen but the results of hands on experience When we're able to learn from the example of other people practice extensively ourselves and get reliable feedback rapid progress results Yet when one or all of these factors is inhibited improvement often becomes impossible Using research and real life examples Young breaks down these elements into twelve simple maxims Whether you're a student studying for an exam an employee facing a new skill at work or just want to get better at something you're interested in his insights will help you do it better
