of the world's great scientific minds separated by an undying hatred and resentment are brought together through the work of fiercely independent physicist Marta McDougal. Marta has developed one of the greatest technological breakthroughs of the age: a machine to bore through the earth's solid crust to reach its very center, but this invention is a two-edged sword. The ultimate weapon, it could be mankind's salvation or its destruction. Packed with explosive action in a world poised on the brink of collapse, this high-tech masterpiece is Paul Preuss's finest achievement. Paul Preuss began his successful writing career after years of producing documentary and television films and writing screenplays. He is the author of twelve novels, including *Venus Prime* Volumes 1, 2, and 3, and the near-future thrillers *Core*, *Human Error*, and *Starfire*. His non-fiction has appeared in *The Washington Post*, *the Los Angeles Times*, *New York Newsday*, and *the San Francisco Chronicle*. Besides writing, he has been a science consultant for several film companies. He lives in San Francisco, California. **Arthur C. Clarke's Venus**
