electoral process What limitations on conventional and nuclear weapons are we safe in accepting and at what levels U S
verification capabilities are an essential part of this debate A collection of insightful essays by the leading experts on
verification issues Verification The Key to Arms Control in the 1990s makes a valuable contribution to the rational and
responsible discussion of arms control BOOK JACKET Title Summary field provided by Blackwell North America Inc All
Rights Reserved Confidence Building in the Arms Control Process James Macintosh, Canada. Non-Proliferation, Arms
Control and Disarmament Division, 1996 Confidence building as an approach to international security management has
traditionally focused on developing agreements featuring well known confidence building measures as opposed to the activity
of confidence building itself This report begins with a critical review of traditional confidence building ideas which highlights
some problems that continue to undermine conventional treatments of confidence building It then discusses in some detail
the essential elements that comprise the transformation view of confidence building That view shifts attention away from
operational measures towards the processes associated with their development and application According to that view
confidence building is a distinct activity undertaken by policy makers with the minimum intention of improving some aspects

of a traditionally antagonistic security relationship through security policy coordination and cooperation. It requires interaction among officials and experts from participating states when conditions are supportive of change. **Arms Control Verification and Compliance** Michael Krepon, 1984
